"I have always had faith that the best writers will rise to the top, like cream, sooner or later, and will become exactly as well-known as they should be-their work talked about, quoted, taught, performed, filmed, set to music, anthologized. Perhaps, with the present collection, Lucia Berlin will begin to gain the attention she deserves." -Lydia Davis A MANUAL FOR CLEANING WOMEN compiles the best work of the legendary short-story writer Lucia Berlin. With the grit of Raymond Carver, the humor of Grace Paley, and a blend of wit and melancholy all her own, Berlin crafts miracles from the everyday, uncovering moments of grace in the Laundromats and halfway houses of the American Southwest, in the homes of the Bay Area upper class, among switchboard operators and struggling mothers, hitchhikers and bad Christians. Readers will revel in this remarkable collection from a master of the form and wonder how they'd ever overlooked her in the first place. Why just reuse a bucket when you can reinvent it? The New 5-Gallon Bucket Book updates a quirky classic with 30+ new ways to take those old buckets and put them to use. Five-gallon buckets are ubiquitous and cheap (or even free). They are right up there with some of man's best inventions, like the wheel and sliced bread. Sure, they can be useful on their own, holding stuff or transporting stuff from place to place. But that's no fun. Put them to use around the house, garden, or farm instead! With common tools and the instructions in this book, you'll find 60+ ideas and projects to make today. Connect with your inner engineer as you: Make something for around the home, like a shoe rack, trash compactor, water filter, or mousetrap. Become more self-sufficient, with a chicken waterer, egg incubator, nesting box, or bee feeder. Have some fun with an air cannon, beanbag toss, drum set, or washtub bass. Get creative by dressing your kid up in a bucket costume for Halloween, making a boat anchor, or a set of music speakers. Grow more in the garden with a sweet potato starter, rolling composter, Japanese beetle trap, vermiculture bin, or walking watering can. As you can see,

there's no shortage of ways to put these humble and hard-working mainstays to work past their prime and keep them out of landfills. Simple step-by-step instructions, as well as parts lists and images of the completed projects, make sure you will have fun and love the results of your work. The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government. Normative reasons are reasons to do and believe things. Intellectual inquiry seems to presuppose their existence, for we cannot justifiably conclude that we exist; that there is an external world; and that there are better and worse ways of investigating it and behaving in it, unless there are reasons to do and believe such things. But just what in the world are normative reasons? In this book a case is made for believing normative reasons are favouring relations that have a single, external source, filling this significant gap in the literature in an area within contemporary philosophy that has quickly grown in prominence. Providing a divine command metanormative analysis of normative reasons on entirely non-religious grounds, its arguments will be relevant to both secular and non-secular audiences alike and will address key issues in meta-ethics, evolutionary theory - especially evolutionary debunking threats to moral reasons and the normative more generally - and epistemology.
