PCR/RT- PCR in situ Jun 17 2021 Although the polymerase chain reaction has revolutionized genetic analysis by amplifying rare nucleic acid sequences, the in situ application is the only method that allows the localization of amplified signal within tissue structure. The applications of in situ polymerase chain reaction have greatly enhanced the field of investigation in many disciplines, including viral infections, gene modification, tumor diagnosis, gene therapy, and cellular distribution of rare mRNA copies. PCR/RT-PCR in situ: Light and Electron Microscopy covers methods of in situ polymerase chain reaction (PCR) and reverse transcription PCR (RT-PCR), two new approaches in visualizing very low amounts of DNA and RNA in tissues and cell cultures at the light and electron microscopy levels. Written by experts in this field, the book provides theoretical consideration, as well as practical approaches to in situ PCR. The authors provide detailed protocols for each step, including the preparation of tissue samples, the rationale for the design of primers and revelation. They also emphasize the need for appropriate controls to meet the requirements of in situ PCR and RT-PCR specificity. Organized in a user-friendly two-column format, this book will provide you with tools necessary to perform and optimize these sensitive and powerful techniques in your research protocols.

Anti-Book May 29 2022 No, Anti-Book is not a book about books. Not exactly. And yet it is a must for anyone interested in the future of the book. Presenting what he terms “a communism of textual matter,” Nicholas Thoburn explores the encounter between political thought and experimental writing and publishing, shifting the politics of text from an exclusive concern with content and meaning to the media forms and social relations by which text is produced and consumed. Taking a “post-digital” approach in considering a wide array of textual media forms, Thoburn invites us to challenge the commodity form of books—to stop imagining books as transcendent intellectual, moral, and aesthetic goods unsullied by commerce. His critique is, instead, one immersed in the many materialities of text. Anti-Book engages with an array of writing and publishing projects, including Antonin Artaud’s paper gris-gris, Valerie Solanas’s

SCUM Manifesto, Guy Debord's sandpaper-bound *Mémoires*, the collective novelist Wu Ming, and the digital/print hybrid of Mute magazine. Empirically grounded, it is also a major achievement in expressing a political philosophy of writing and publishing, where the materiality of text is interlaced with conceptual production. Each chapter investigates a different form of textual media in concert with a particular concept: the small-press pamphlet as "communist object," the magazine as "diagrammatic publishing," political books in the modes of "root" and "rhizome," the "multiple single" of anonymous authorship, and myth as "unidentified narrative object." An absorbingly written contribution to contemporary media theory in all its manifestations, *Anti-Book* will enrich current debates about radical publishing, artists' books and other new genre and media forms in alternative media, art publishing, media studies, cultural studies, critical theory, and social and political theory.

Anti-colonialism and Education May 05 2020 There is a rich intellectual history to the development of anti-colonial thought and practice. In discussing the politics of knowledge production, this collection borrows from and builds upon this intellectual tradition to offer understandings of the macro-political processes and structures of education delivery (e. g., social organization of knowledge, culture, pedagogy and resistant politics). The contributors raise key issues regarding the contestation of knowledge, as well as the role of cultural and social values in understanding the way power shapes everyday relations of politics and subjectivity. In reframing anti-colonial thought and practice, this book reclaims the power of critical, oppositional discourse and theory for educational transformation. *Anti-Colonialism and Education: The Politics of Resistance*, includes some of the most current theorizing around anti-colonial practice, written specifically for this collection. Each of the essays extends the terrain of the discussion, of what constitutes anti-colonialism. Among the many discursive highlights is the interrogation of the politics of embodied knowing, the theoretical distinctions and connections between anti-colonial thought and post-colonial theory, and the identification of the particular lessons of anti-colonial theory for critical educational practice. Essays explore such key issues as the challenge of articulating anti-colonial thought as an epistemology of the colonized, anchored in the indigenous sense of collective and common colonial consciousness; the conceptualization of power configurations embedded in ideas, cultures and histories of marginalized communities; the understanding of indigeneity as pedagogical practice; and the pursuit of agency, resistance and subjective politics through anti-colonial learning.

Common Sense and Nuclear Warfare Oct 29 2019 Written at the height of the Cold War in 1959, *Common Sense and Nuclear Warfare* was published in an effort 'to prevent the catastrophe which would result from a large scale H-bomb war'. Bertrand Russell's staunch anti-war stance is made very clear in this highly controversial text, which outlines his sharp insights into the threat of nuclear conflict and what should be done to avoid it. Russell's argument, that the only way to end the threat of nuclear war is to end war itself, is as relevant today as it was on first publication."

Common Sense and Legal Judgment Jan 01 2020 What does it mean when a judge in a court of law uses the phrase "common sense"? Is it a type of evidence or a mode of reasoning? In a world characterized by material and political inequalities, whose common sense should inform the law? *Common Sense and Legal Judgment* explores this rhetorically powerful phrase, arguing that common sense, when invoked in political and legal discourses without adequate reflection, poses a threat to the quality and legitimacy of legal judgment. Often operating in the service of conservatism, populism, or majoritarianism, common sense can harbour stereotypes, reproduce unjust power relations, and silence marginalized people. Nevertheless, drawing the works of theorists such as Thomas Reid, Antonio Gramsci, and Hannah Arendt into conversation with rulings by the Supreme Court of Canada, Patricia Cochran demonstrates that with careful attention, the democratic, egalitarian, and community-sustaining aspects of common sense can be brought to light. A call for critical self-reflection and the close scrutiny of power relationships and social contexts, this book is a direct response to social justice predicaments and their confounding relationships to law. Creative and interdisciplinary, *Common Sense and Legal Judgment* reinvigorates feminist and anti-poverty understandings of judgment, knowledge, justice, and accountability.

Voted Out Jul 07 2020 When, in 1992, the citizens of Colorado ratified Amendment 2, effectively stripping lesbians, gay men, and bisexuals of protection from discrimination under the state's constitution, the vote divided the state and left the gay population dispirited and angry. Their psychological predicament offered an opportunity to examine the precise intersection at which the individual meets social oppression. *Voted Out* is the first to document the psychological impact of anti-gay legislation on the gay community, illustrating the range of reactions, from depression, anger, and anxiety to a sense of empowerment and a desire to mobilize, which such legislation can engender. It also offers a detailed account of an innovative team approach to the qualitative coding and analysis process. Blending traditional quantitative methods with more innovative qualitative analyses, it provides a valuable opportunity to compare quantitative and qualitative data focused on the same issue within one volume. The volume specifically addresses researchers' use of the results of their research beyond publication and the ways in which research undertaken to examine a social issue can be returned to the community.

A Global History of Anti-Apartheid Feb 11 2021 This book explores the global history of anti-apartheid and international solidarity with southern African freedom struggles from the 1960s. It examines the institutions, campaigns and ideological frameworks that defined the globalization of anti-apartheid, the ways in which the concept of solidarity was mediated by individuals, organizations and states, and considers the multiplicity of actors and interactions involved in generating and sustaining anti-apartheid around the world. It includes detailed accounts of key case studies from Europe, Asia, and Latin America, which illustrate the complex relationships between local and global agendas, as well as the diverse political cultures embodied in anti-apartheid. Taken together, these examples reveal the tensions and synergies, transnational webs and local contingencies that helped to create the sense of 'being global' that united worldwide anti-apartheid campaigns.

Conservatism in America Aug 27 2019 This book argues that the American conservative movement, as it now exists, does not have deep roots. It began in the 1950s as the invention of journalists and men of letters reacting to the early Cold War and trying to construct a rallying point for likeminded opponents of international Communism. The resulting movement has exaggerated the permanence of its values; while its militant anti-Communism, instilled in its followers, and periodic suppression of dissent have weakened its capacity for internal debate. Their movement came to power at least partly by burying an older anti-welfare state Right, one that in fact had enjoyed a social following that was concentrated in a small-town America. The newcomers played down the merits of those they had replaced; and in the 1980's the neoconservatives, who took over the postwar conservative movement from an earlier generation, belittled their predecessors in a similar way. Among the movement's major accomplishments has been to recreate its own past. The success of this revised history lies in the fact that even the movement's critics are now inclined to accept it.

Common Sense, Science and Scepticism Dec 12 2020 Can we know anything for certain? Dogmatists think we can, sceptics think we cannot, and epistemology is the great debate between them. Some dogmatists seek certainty in the deliverances of the senses. Sceptics object that the senses are not an adequate basis for certain knowledge. Other dogmatists seek certainty in the deliverances of pure reason. Sceptics object that rational self-evidence is no guarantee of truth. This book is an introductory and historically-based survey of the debate, siding for the most part with scepticism to show that the desire to vanquish it has often led to doctrines of idealism or anti-realism. Scepticism, science and common sense produce another view, fallibilism or critical rationalism: although we can have little or no certain knowledge, as the sceptics maintain, we can and do have plenty of conjectural knowledge. Fallibilism incorporates an uncompromising realism about perception, science, and the nature of truth.

New Culture, New Right Aug 08 2020 New Culture, New Right is the first English-language study of the identitarian movements presently reshaping the contours of European politics. The study's focus is Alain de Benoist's GRECE (Groupement de Recherche et d'Etude pour la Civilisation Européenne), which Paul Piccone of Telos described as the most interesting group of continental thinkers since the existentialists of the 1950s and which elsewhere is seen as the leading school of contemporary Right-wing thought. Made up of veterans from various nationalist, traditionalist, far Right, and regionalist movements, the GRECE began as an association of French intellectuals committed to restoring the crumbling cultural foundations of European life and identity. Due to the quality of its publications and its philosophically persuasive reformulation of the Right project, it attracted an immediate audience. By the late 1970s it had recruited an impressive array of Continental thinkers to its ranks. In Italy, Germany, Belgium, and a number of other European countries, there have since emerged organizations and publishing concerns either directly linked to the Paris-based GRECE or involved in analogous endeavors. As a result of these diffusions, GRECE-style identitarianism has come to form the chief ideological alternative to the regnant liberalism. The European New Right to which the GRECE gave birth is new, however, not in the modernist sense of being novel, but in the traditionalist sense of reappropriating an origin whose meaningful possibilities remain open for realization. Such a revolutionary return to Europe's roots has never seemed so urgent. After a half century under the liberal-democratic regimes imposed by the United States in 1945, Europeans now face extinction as a race and a culture. In opposition to the ethnocidal forces of the American Occupation and its European collaborators, New Rightists appeal to the primordial in their people's heritage, aiming to awake a spirit of resistance and renaissance in them. The result, as documented in this introduction to their ideas, is one of the most formidable critiques ever made of the liberal project. Michael O'Meara, Ph.D., studied social theory at the Écoles des Hautes Etudes en Sciences Sociales, and modern European history at the University of California. He is the author of *Guillaume Faye and the Battle of Europe* (2013), also published by Arktos.

Anti-Intellectualism in American Life Jan 25 2022 Winner of the 1964 Pulitzer Prize in Nonfiction Anti-Intellectualism in American Life is a book which throws light on many features of the American character. Its concern is not merely to portray the scornors of intellect in American life, but to say something about what the intellectual is, and can be, as a force in a democratic society. "As Mr. Hofstadter unfolds the fascinating story, it is no crude battle of eggheads and fatheads. It is a rich, complex, shifting picture of the life of the mind in a society dominated by the ideal of practical success." —Robert Peel in the Christian Science Monitor

The Paranoid Style in American Politics Oct 22 2021 This timely reissue of Richard Hofstadter's classic work on the fringe groups that influence American electoral politics offers an invaluable perspective on contemporary domestic affairs. In The Paranoid Style in American Politics, acclaimed historian Richard Hofstadter examines the competing forces in American political discourse and how fringe groups can influence — and derail — the larger agendas of a political party. He investigates the politics of the irrational, shedding light on how the behavior of individuals can seem out of proportion with actual political issues, and how such behavior impacts larger groups. With such other classic essays as “Free Silver and the Mind of 'Coin' Harvey” and “What Happened to the Antitrust Movement?, ” The Paranoid Style in American Politics remains both a seminal text of political history and a vital analysis of the ways in which political groups function in the United States.

Polemic in the Book of Hebrews Mar 03 2020 The author of Hebrews is arguing that God himself has brought about the fulfillment of these institutions through his Son's priesthood, his once-for-all sacrifice, and the new covenant he inaugurated in the last days. These new institutions are never denied the Jews. In fact, the context of the epistle presumes that these are primarily for the Jews, considering that the author was speaking to a Jewish-Christian community. The author is not arguing for the abandonment by God of the Jewish people, but rather for the abandonment of the shadowy means by which God's people drew near to him. It is here we can speak of a qualified supersessionism. According to the author of Hebrews, the Levitical priesthood, the Mosaic covenant, and the Levitical sacrifices have been superseded by Jesus' priesthood, the new covenant, and Jesus' once-for-all sacrifice. However, we conclude that the polemical passages in Hebrews do not promote hatred of the Jews, nor do they advocate the destruction of the Jewish people. Rather, the author of Hebrews stresses the fulfillment of specific Jewish institutions for the benefit of the Jews. It is this idea of fulfillment that rules out the charge that the epistle promotes the supersession of the Jewish people. Because of God's great love for his people, he has provided a superior way by which his people can draw near to him. --from the Conclusion Anti-Yankee Feelings in Latin America Jul 19 2021

Making Sense of Affirmative Action Jun 05 2020 Kasper Lippert-Rasmussen here poses the question: "Is affirmative action morally (un)justifiable?" As a phrase that frequently surfaces in major headlines, affirmative action is a highly controversial and far-reaching issue, yet most of the recent scholarly literature surrounding the topic tends to focus on defending one side or another in a particular case of affirmative action. Lippert-Rasmussen instead takes a wide-angle view, addressing each of the prevailing contemporary arguments for and against affirmative action. In his introduction, he proposes an amended definition of affirmative action and considers what forms, from quotas to outreach strategies, may fall under this revised definition. He then analyzes the strengths and weaknesses of each position, relative to each other, and applies recent discussions in political philosophy to assess if and how each argument might justify different conclusions given different cases or philosophical frameworks. Each chapter investigates an argument for or against affirmative action. The six arguments for it consist of compensation, anti-discrimination, equality of opportunity, role model, diversity, and integration. The five arguments against it are reverse discrimination, stigma, mismatch, publicity, and merit. Lippert-Rasmussen also expands the discussion to include affirmative action for groups beyond the prototypical examples of African Americans and women, and to consider health and minority languages as possible criteria for inclusion in affirmative action initiatives. Based on the comparative strength of anti-discrimination and equality of opportunity arguments, Making Sense of Affirmative Action

ultimately makes a case in favor of affirmative action; however, its originality lies in Lippert-Rasmussen's careful exploration of moral justifiability as a contextual evaluative measure and his insistence that complexity and a comparative focus are inherent to this important issue.

The Anti-Group Nov 30 2019 The 'anti-group' is a major conceptual addition to the theory and practice of group psychotherapy. It comprises the negative, disruptive elements, which threaten to undermine and even destroy the group, but when contained, have the potential to mobilise the group's creative processes. Understanding the 'anti-group' gives therapists new perspectives on the nature of relationships and alternative strategies for managing destructive behaviour.

Jews Out of the Question Dec 24 2021 A provocative study of opposition to anti-Semitism in contemporary political philosophy. In post-Holocaust philosophy, anti-Semitism has come to be seen as a paradigmatic political and ideological evil. *Jews Out of the Question* examines the role that opposition to anti-Semitism has played in shaping contemporary political philosophy. Elad Lapidot argues that post-Holocaust philosophy identifies the fundamental, epistemological evil of anti-Semitic thought not in thinking against Jews, but in thinking of Jews. In other words, what philosophy denounces as anti-Semitic is the figure of "the Jew" in thought. Lapidot reveals how, paradoxically, opposition to anti-Semitism has generated a rejection of Jewish thought in post-Holocaust philosophy. Through critical readings of political philosophers such as Adorno, Horkheimer, Sartre, Arendt, Badiou, and Nancy, the book contends that by rejecting Jewish thought, the opposition to anti-Semitism comes dangerously close to anti-Semitism itself, and at work in this rejection, is a problematic understanding of the relations between politics and thought—a troubling political epistemology. Lapidot's critique of this political epistemology is the book's ultimate aim. Elad Lapidot is Assistant Professor of Philosophy at the University of Bern in Switzerland. He is coeditor (with Micha Brumlik) of *Heidegger and Jewish Thought: Difficult Others*.

Making Sense of Anti-trade Sentiment Nov 03 2022 Opinion polls indicate that a considerable portion of the U.S. public holds negative views of international trade. The extent of anti-trade sentiment exhibited by the American public is largely out of step with public opinion elsewhere in the world. In fact, the U.S. may be one of the most trade-wary societies. Worries that trade, particularly increased imports, will lead to job loss and/or reduced wages for domestic workers are thought to underlie the negative views. Examining the extent to which trade adversely affects domestic workers, White documents statistical relationships between exports and imports and domestic employment/wages; however, the magnitudes of the estimated effects appear too small to justify public opinion on the topic. To better understand U.S. public opinion of international trade, and to explain why Americans are, in general, less supportive of trade, the author considers loss-aversion, incomplete/imperfect information, and the ability to process information as possible alternative explanations.

Anti-Constitutional Populism Sep 28 2019 Around the world, populist parties have sprung up in formerly and formally liberal-democratic polities, challenging their existing political parties and leaders, and frequently overwhelming them. These challenges and successes were rarely predicted, arriving so soon after the wave of liberal democratic and constitutional enthusiasms, proclamations and institution-building which peaked in the 1990s. Bringing together scholars from law, political science and philosophy, this collection explores the character of contemporary populisms and their relationships to constitutional democracy. With contributors from around the world, it offers a diverse range of nuanced perspectives on populism as a global phenomenon. Using comparative and multi-disciplinary techniques, this book considers the specifics and similarities of populisms, and raises general questions about their nature and potential futures.

Nothing Has to Make Sense Jul 31 2022 How Western nations have consolidated their whiteness through the figure of the Muslim in the post-9/11 world While much has been written about post-9/11 anti-Muslim racism (often termed Islamophobia), insufficient attention has been given to how anti-Muslim racism operates through law and is a vital part of law's protection of whiteness. This book fills this gap while also providing a unique new global perspective on white supremacy. Sherene H. Razack, a leading critical race and feminist scholar, takes an innovative approach by situating law within media discourses and historical and contemporary realities. We may think of law as logical, but, argues Razack, its logic breaks down when the subject is Muslim. Tracing how white subjects and majority-white nations in the post-9/11 era have consolidated their whiteness through the figure of the Muslim, Razack examines four sites of anti-Muslim racism: efforts by American evangelical Christians to ban Islam in the school curriculum; Canadian and European bans on Muslim women's clothing; racial science and the sentencing of Muslims as terrorists; and American national memory of the torture of Muslims during wars and occupations. Arguing that nothing has to make sense when the subject is Muslim, she maintains that these legal and cultural sites reveal the dread, phobia, hysteria, and desire that mark the encounter between Muslims and the West. Through the prism of racism, *Nothing Has to Make Sense* argues that the figure of the Muslim reveals a world divided between the deserving and the disposable, where people of European origin are the former and all others are confined in various ways to regimes of disposability. Emerging from critical race theory, and bridging with Islamophobia/critical religious studies, it demonstrates that anti-Muslim racism is a revelatory window into the operation of white supremacy as a global force.

Uncommon Sense Jan 13 2021 An examination of Herbert Marcuse's political claim for the aesthetic dimension, focusing on defamiliarization as a means of developing radical sensibility. In *Uncommon Sense*, Craig Leonard argues for the contemporary relevance of the aesthetic theory of Herbert Marcuse—an original member of the Frankfurt School and icon of the New Left—while also acknowledging his philosophical limits. His account reinvigorates Marcuse for contemporary readers, putting his aesthetic theory into dialogue with antiracist and anti-capitalist activism. Leonard emphasizes several key terms not previously analyzed within Marcuse's aesthetics, including defamiliarization, anti-art, and habit. In particular, he focuses on the centrality of defamiliarization—a subversion of common sense that can be a means to the development of what Marcuse refers to as “radical sensibility.” Leonard brings forward Marcuse's claim that the aesthetic dimension is political because of its refusal to operate according to the repressive common sense that establishes and maintains relationships dictated by advanced capitalism. For Marcuse, defamiliarization is at the center of the aesthetic dimension, offering the direct means of stimulating its political potential. Leonard expands upon Marcuse's aesthetics by drawing on the work of Sylvia Wynter, going beyond Marcuse's predominantly European and patrilineal intellectual framework—while still retaining his aesthetic theory's fundamental characteristics—toward a human dimension requiring decolonial, feminist, antiracist, and counterpoetic perspectives.
