*Social Housing in Europe* May 01 2020 All countries aim to improve housing conditions for their citizens but many have been forced by the financial crisis to reduce government expenditure. Social housing is at the crux of this tension. Policy-makers, practitioners and academics want to know how other systems work and are looking for something written in clear English, where there is a depth of understanding of the literature in other languages and direct contributions from country experts across the continent. *Social Housing in Europe* combines a comparative overview of European social housing written by scholars with in-depth chapters written by international housing experts. The countries covered include Austria, Denmark, England, France, Germany, Hungary, Ireland, The Netherlands and Sweden, with a further chapter devoted to CEE countries other than Hungary. The book provides an up-to-date international comparison of social housing policy and practice. It offers an analysis of how the social housing system currently works in each country, supported by relevant statistics. It identifies European trends in the sector, and opportunities for innovation and improvement. These country-specific chapters are accompanied by topical thematic chapters dealing with subjects such as the role of social housing in urban regeneration, the privatisation of social housing, financing models, and the impact of European Union state aid regulations on the definitions and financing of social housing.

*Tom Kundig: Houses* Jun 25 2022 "Architect Tom Kundig is known worldwide for the originality of his work. This paperback edition of *Tom Kundig: Houses*, first published in 2006, collects five of his most prominent early residential projects, which remain touchstones for him today. In a new preface written for this edition, Kundig reflects on the influence that these designs continue to have on his current thinking. Each house, presented from conceptual sketches through meticulously realized details, is the product of a sustained and active collaborative process among designer, builder, and client. The work of the Seattle-based architect has been called both raw and refined--disparate characteristics that produce extraordinarily inventive

designs inspired by both the industrial structures ubiquitous to his upbringing in the Pacific Northwest and the vibrant craft cultures that are fostered there." --

**The Wisconsin Supper Clubs Story** Oct 06 2020 In *The Wisconsin Supper Clubs Story: An Illustrated History*, with *Relish*, the third in his popular series, Ron Faiola invites readers to pull up a chair as he regales us with more than a century of history behind this beloved dining tradition, guiding readers from London to Hollywood, to New York City, and finally, to his own home state. The journey begins with the world's very first supper clubs, which emerged in London in the mid-1800s. The phenomenon was adopted by New York's restaurant and saloon owners in the late 1800s, and soon spread to suburban and rural areas. Across the United States, supper clubs enhanced culinary and dining traditions, and greatly influenced the evolution of live entertainment such as cabaret, comedy, and jazz, and dance crazes such as "The Charleston," "Turkey Trot," and the eyebrow-raising "Wiggle Wiggle." Faiola unfolds the history of Wisconsin's supper clubs with stories of its most iconic establishments, such as Ray Radigan's, Hoffman House, and Fazio's on Fifth. He reveals the remarkable durability of the supper club tradition as it withstood WWI, the 1918 Spanish flu pandemic, Prohibition, the Great Depression, WWII, as well as the mid-twentieth century advent of fast food franchises and casual dining chains. Through their innovation and determination, supper club owners and their staff have managed not only to survive, but to maintain generations-spanning restaurants that remain prominent features of their communities to this day. Bursting with full-color photographs, newspaper clippings, and first-hand interviews, *The Wisconsin Supper Clubs Story: An Illustrated History*, with *Relish* offers a hearty buffet of the history of Wisconsin's most iconic supper clubs and the folks who keep the cocktails poured, the relish trays fresh, and ensure there's always an open seat at the table.

**William Krisel's Palm Springs** Jul 03 2020 This first major monograph chronicling the work and architectural philosophy of William Krisel features examples and insights from Krisel's own papers, culled from his personal collection as well as the extensive archives of the Getty Research Institute. Krisel's architectural drawings and renderings, as well as many archival photographs, highlight examples of his custom homes, mass-produced housing, recreational facilities, and commercial projects in Palm Springs and rest of the Coachella Valley.

**The Women's Army Corps, 1945-1978** Dec 08 2020 After years out of print, this new and redesigned book brings back the best and most complete history of the Women's Army Corps. Loaded with history, tables, charts, statistics, photos, personalities, and many useful appendices (including a history of WAC uniforms), *The Women's Army Corps, 1945-1978* is must reading for anyone who served those years in the Army as well as for those who want a complete history of the modern-day military. Author Bettie Morden served from 1942-1972 and she used her experience and access to people and records to compile the definitive reference work. Col. Morden is a graduate of the WAC Officers' Advanced Course (1962); Command and General Staff College (1964); and the Army Management School (1965). She has been awarded the Distinguished Service Medal, the Legion of Merit, the Joint Service Commendation Medal, and the Army Commendation Medal with Oak Leaf Cluster.

**Congressional Record** Mar 23 2022 The *Congressional Record* is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The *Congressional Record* began publication in 1873. Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States (1789-1824)*, the *Register of Debates in Congress (1824-1837)*, and the *Congressional Globe (1833-1873)*

**Blueprints for Modern Living** Sep 28 2022 Includes eight main essays as well as contributions from Elizabeth A.T. Smith, this volume documents the Case Study House Program, carried out between 1945 and 1966 where 36 experimental prototype houses were built by leading

Californian architects.

**Color for Architects (Architecture Brief)** Nov 18 2021 As far back as the earliest Greek temples, color has been an integral part of architecture but also one of its least understood elements. Color theory is rarely taught in architecture schools, leaving architects to puzzle out the hows and whys of which colors to select and how they interact, complement, or clash. Color for Architects is profusely illustrated and provides a clear, concise primer on color for designers of every kind. This latest volume in our Architecture Briefs series combines the theoretical and practical, providing the basics on which to build a fuller mastery of this essential component of design. A wealth of built examples, exercises, and activities allows students to apply their learning of color to real-world situations.

**Le Corbusier Redrawn** Jan 27 2020 Le Corbusier (1887-1965) was the most significant architect of the twentieth century. Every architecture student examines the Swiss master's work. Yet, all too frequently, they rely on reproductions of faded drawings of uneven size and quality. Le Corbusier Redrawn presents the only collection of consistently rendered original drawings (at 1:200 scale) of all twenty-six of Le Corbusier's residential works. Using the original drawings from the Le Corbusier Foundation's digital archives, architect Steven Park has beautifully redrawn 130 perspectival sections, as well as plans, sections, and elevations of exterior forms and interior spaces. These remarkable new drawings—which combine the conceptual clarity of the section with the spatial qualities of the perspective—not only provide information about the buildings, they also help students experience specific works spatially as they learn to critically examine Le Corbusier's works.

**Eames House** Aug 23 2019 Part of a series of technically informative monographs embracing a broad spectrum of internationally renowned buildings, this work deals with Eames House in California, and includes a comprehensive set of technical drawings and working details.

**The Paranoid Style in American Politics** Jun 13 2021 This timely reissue of Richard Hofstadter's classic work on the fringe groups that influence American electoral politics offers an invaluable perspective on contemporary domestic affairs. In *The Paranoid Style in American Politics*, acclaimed historian Richard Hofstadter examines the competing forces in American political discourse and how fringe groups can influence — and derail — the larger agendas of a political party. He investigates the politics of the irrational, shedding light on how the behavior of individuals can seem out of proportion with actual political issues, and how such behavior impacts larger groups. With such other classic essays as “Free Silver and the Mind of 'Coin' Harvey” and “What Happened to the Antitrust Movement?,” *The Paranoid Style in American Politics* remains both a seminal text of political history and a vital analysis of the ways in which political groups function in the United States.

**Case study houses, 1945-1966** Jul 27 2022

**Statistical Yearbook** Aug 04 2020

**Internal** Jan 09 2021 As the number and distinctiveness of design directions in contemporary architecture expands an outcome has emerged of a contradictory nature. While many of these directions hold great intrigue, a troubling aspect arises in that in their realization an "incompleteness" is often exhibited, one expressing a less developed architectural richness expressed an under-utilized nature of the architectural language itself. *Internal* addresses this issue with a focus on topics underlying the creation of architectural languages. Concentrating on strategies and concepts that inform the creation of cohering architectural languages versus "external" issues affecting design, such as those necessary to accommodate site or program, *Internal* focuses on design considerations with the authority grounded in "internal" language-based architectural issues. Identifying underlying themes and strategies necessary to create coherent and informed architectural languages constitutes the effort underlying this book.

**Lectures On Computation** Dec 28 2019 Covering the theory of computation, information and communications, the physical aspects of computation, and the physical limits of computers, this text is based on the notes taken by one of its editors, Tony Hey, on a lecture course on computation given by

*Corcoran Gallery of Art* Oct 25 2019 This authoritative catalogue of the Corcoran Gallery of Art's renowned collection of pre-1945 American paintings will greatly enhance scholarly and public understanding of one of the finest and most important collections of historic American art in the world. Composed of more than 600 objects dating from 1740 to 1945.

*Design* Dec 20 2021 Aboriginal design is of a distinctly cultural nature, based in the Dreaming and in ancient practices grounded in Country. It is visible in the aerodynamic boomerang, the ingenious design of fish traps and the precise layouts of community settlements that strengthen social cohesion. Alison Page and Paul Memmott show how these design principles of sophisticated function, sustainability and storytelling, refined over many millennia, are now being applied to contemporary practices. *Design: Building on Country* issues a challenge for a new Australian design ethos, one that truly responds to the essence of Country and its people. About the series: Each book is a collaboration between Indigenous and non-Indigenous writers and editors; the series is edited by Margo Neale, senior Indigenous curator at the National Museum of Australia. Other titles in the series include: *Songlines* by Margo Neale & Lynne Kelly (2020); *Country* by Bill Gammage & Bruce Pascoe (2021); *Plants* by Zena Cumpston, Michael Fletcher & Lesley Head (2022); *Astronomy* (2022); *Innovation* (2023).

**Personal Narrative of the First Voyage of Columbus to America** Jun 01 2020

*Life and Shape* Apr 23 2022 Since he followed it all of his life, Richard Neutra (1892-1970) must have relished the maxim of the Greek philosopher Socrates: "The unexamined life is not worth living." In his books, articles, lectures, correspondence, and even casual conversations, Neutra constantly examined, not only his own life, but the lives of others - present and past - and the human and natural world they inhabited. Nowhere was this truer than in his autobiography "Life and Shape", first published in 1962, which now, after years of being out of print, has again happily come back to life. As opposed to "Survival Through Design" (1954), his superb collection of densely philosophical essays, Neutra took a different tack in "Life and Shape", following a lighter and more deliberately relaxed approach. It was as if the usually serious and intense Neutra was giving himself permission to reveal his richly ironic sense of humor and to probe areas in his personal experience which he had not examined as closely before. These included hitherto unrecorded memories of his parents, siblings, and his childhood and education in imperial Vienna, his numbing experiences as an Austrian artillery officer in World War I, and the beginnings of his architectural consciousness in his response to the work of Otto Wagner, Adolf Loos, Erich Mendelsohn, Louis Sullivan, and Frank Lloyd Wright. As in the autobiographies of Sullivan and Wright, "Life and Shape" concentrates on Neutra's earlier years, both in Europe and America. While he naturally recounts his memories of such well-known commissions as the Lovell Health House (1929), his own Van der Leeuw Research House (1933) and the von Sternberg House (1935), he also muses on such less famous buildings as the small, and now virtually forgotten, Mosk House (1933). "Life and Shape" also confirms Neutra's obsession with the passage of time and his firm resolution never to waste it. Like Sullivan and Wright, Neutra eschewed writing a factual chronicle, and - at the age of 70 - composed instead a meditation on the aspects of his life and work that seemed, in retrospect, to be the most interesting and significant. He felt no need to try to "include everything" but rather to present an honest recounting of his memory of his life. In writing my own "Richard Neutra and the Search for Modern Architecture" [Oxford University Press, 1982; Rizzoli Press, 2006], I relied on "Life and Shape" when I wanted an account of Neutra's experiences told in his own authentic voice.

For future generations of architects, historian, and readers, it is good to have it back. - Thomas S. Hines, UCLA Professor Emeritus of History and Architecture

Case Study Houses, 1945-1962 Nov 30 2022 Sponsored by John Entenza's Arts & Architecture magazine, the Case Study Houses program brought new thinking, techniques, and materials to post-war California house building including Los Angeles. Contains the work of Charles Eames, Eero Saarinen, Craig Ellwood.

*Quotations from Chairman Mao Tsetung* Jul 15 2021

**Walden Two** Nov 06 2020 A reprint of the 1976 Macmillan edition. This fictional outline of a modern utopia has been a center of controversy ever since its publication in 1948. Set in the United States, it pictures a society in which human problems are solved by a scientific technology of human conduct.

**Fahrenheit 451** Mar 11 2021 A fireman in charge of burning books meets a revolutionary school teacher who dares to read. Depicts a future world in which all printed reading material is burned.

Mid-Century Britain Nov 26 2019 Leading expert and passionate advocate of modern British architecture Elain Harwood gives the best overview of British architecture from 1938 to 1963 – mid-century buildings. Growing in popularity and with an increasing understanding of their importance as a background to our lives, the buildings range from the Royal Festival Hall, Newcastle City Hall and to Deal Pier and Douglas ferry terminal, from prefabs and ice cream parlours to Coventry Cathedral and the Golden Lane Estate. The author writes in non-technical, layman's language about the design, architecture and also the influence of these buildings on the lives of our towns and cities. The author has arranged the huge variety of buildings into: Houses and Flats; Churches and Public Buildings; Offices; Shops; Showrooms and Cafes; Hotels and Public Houses; Cinemas, Theatres and Concert Halls; Industrial Buildings and Transport. There is an insightful introduction that places these buildings in the context of 20th-century architecture generally and globally. All fantastically photographed to make this a must have for anyone interested in our built heritage. Postwar Britain architects often saw architecture as a powerful means to improve the quality of our lives after the shadow of war. This is the fascinating story of what they built to meet that challenge.

Historic Residential Suburbs Oct 18 2021

**Case Study Houses 1945-1966** Oct 30 2022

**The Stahl House: Case Study House #22** Aug 28 2022 The Stahl House: Case Study House #22, The Making of a Modernist Icon is the official autobiography of this world-renowned architectural gem by the family that made it their home. Considered one of the most iconic and recognizable examples of mid-century modern homes in the world, the Stahl House was first envisioned by the owners Buck and Carlotta Stahl, designed by architect Pierre Koenig, and immortalized by photographer Julius Shulman. This 1960 glass-and-steel home in the Hollywood Hills has come to embody the idealism of a generation in search of the American dream. As one of the Case Study Houses designed between 1945 and 1966 under the vision of John Entenza and Arts & Architecture magazine, this was an affordable yet progressive design experiment to address the postwar housing shortage. The result--a two-bedroom, 2,300-square-foot house with glass walls that disappear into a 270-degree panorama of Los Angeles--became Koenig's pièce de résistance. The Stahl House broke rules, defied building codes that discouraged building on cliffs, and expanded the possibilities of residential architecture. The glass walls blurred the boundary between indoors and outdoors. The building seemed to merge with the city itself, the lines of the structure aligning with the geometry of the city's gridded streets. "Los Angeles becomes an extension of the house and vice versa," Koenig said. "The house is just a part of the city." The book shares the never-before-told inside story by the Stahl family's adult children who grew up there and still graciously give home tours to fans from around the world. Through

extensive research and interviews, historical information and personal photos are featured. This includes Buck Stahl's initial vision of the home with his own DIY schematic model for how to build on the complicated site. It also includes blueprints, floor plans, and sketches by Pierre Koenig, as well as Julius Shulman's renowned photographs. Additionally, photographs of the house used in high-end, fashion ad campaigns and film and television are also included, cementing The Stahl House's prominence in contemporary culture.

**Selldorf Architects** Sep 16 2021 A comprehensive book on Selldorf Architects, with a detailed look at the museums, residences, and public buildings the firm has designed in the United States and abroad. Founding principal Annabelle Selldorf was born in Cologne, Germany and educated at the Pratt Institute and Syracuse University. The firm launched into international prominence with the opening of New York's Neue Galerie in 2001. Since, Selldorf Architects has become known for galleries, cultural projects, and as well as private homes. More recently, the firm has made its mark with Sims Municipal Recycling in Brooklyn in 2013. The design and construction won an Award for Excellence in Design from the Public Design Commission. In 2014, Selldorf Architects received the commission to build the expansion of the Museum of Contemporary Art in San Diego. This book begins with an extensive conversation between Tom Eccles and Annabelle Selldorf, as well as an essay by architecture critic Ian Volner. A newly-shot, full color portfolio by renowned photographer Todd Eberle is complimented by an in-depth look at the story behind 30 selected projects, including architectural plans and sketches.

**Acts of the Legislature of West Virginia** Sep 24 2019

**Crocker-Langley San Francisco Directory** Mar 30 2020

**The Black Panther Party (reconsidered)** Sep 04 2020 Featuring never-before-published essays by former Panther members and Panther scholars, a collection of articles examines the black revolutionaries' organizational dynamics, treatment of women, and controversial legacy. Tour. IP.

**Case Study Houses** Jan 01 2023 With 36 prototype designs, the Case Study House program created paradigms for modern living that would extend their influence far beyond their Los Angeles heartland. This essential introduction features 150 photographs and plans to explore each of these model residences and their architects, including Richard Neutra, Charles and Ray Eames, and...

*The Broken House* Feb 19 2022 'Exquisitely written... haunting... Few books, I think, capture so well the sense of a life broken for ever by trauma and guilt' Sunday Times 'An unsparing, honest and insightful memoir, that shows how private failure becomes national disaster' Hilary Mantel Twenty years after the end of the war, Horst Krüger attempted to make sense of his childhood. He had grown up in a quiet Berlin suburb. Here, people lived ordinary lives, believed in God, obeyed the law, and were gradually seduced by the promises of Nazism. He had been 'the typical child of innocuous Germans who were never Nazis, and without whom the Nazis would never have been able to do their work'. With tragic inevitability, this world of respectability, order and duty began to crumble. Written in accomplished prose of lingering beauty, *The Broken House* is a moving coming-of-age story that provides a searing portrait of life under the Nazis.

*The New Old House* Aug 16 2021 The New Old House presents 18 private historic homes, from North America to Europe, and traces the ingenious ways architects have revitalized and refreshed them for a new generation. Most of the renovations occurred in the last decade, but all of the homes have origins reaching back into the past, in some cases hundreds of years. Projects and firms featured include Greenwich House, Allan Greenberg; Longbranch, Jim Olson; Astley Castle, Witherford Watson Mann; Hunsett Mill, Acme; Cotswolds House, Richard Found; plus more than a dozen others. These projects address such timely factors as sustainability, multiculturalism, preservation, and style, and demonstrate the unique beauty and elegance that

comes from the interweaving of modernity and history.

Eames Design Feb 28 2020 A year-by-year progression of the projects undertaken by the Eames office beginning with 1941

*The Assault* Jan 21 2022 It is the winter of 1945, the last dark days of World War II in occupied Holland. A Nazi collaborator, infamous for his cruelty, is assassinated as he rides home on his bicycle. The Germans retaliate by burning down the home of an innocent family; only twelve-year-old Anton survives. Based on actual events, *The Assault* traces the complex repercussions of this horrific incident on Anton's life. Determined to forget, he opts for a carefully normal existence: a prudent marriage, a successful career, and colorless passivity. But the past keeps breaking through, in relentless memories and in chance encounters with others who were involved in the assassination and its aftermath, until Anton finally learns what really happened that night in 1945—and why.

An Eames Anthology May 25 2022 An Eames Anthology collects for the first time the writings of the esteemed American architects and designers Charles and Ray Eames, illuminating their marriage and professional partnership of fifty years. More than 120 primary-source documents and 200 illustrations highlight iconic projects such as the Case Study Houses and the molded plywood chair, as well as their work for major corporations as both designers (Herman Miller, Vitra) and consultants (IBM, Polaroid). Previously unpublished materials appear alongside published writings by and about the Eameses and their work, lending new insight into their creative process. Correspondence with such luminaries as Richard Neutra and Eero Saarinen provides a personal glimpse into the advance of modernity in mid-century America.

They Thought They Were Free Feb 07 2021 “When this book was first published it received some attention from the critics but none at all from the public. Nazism was finished in the bunker in Berlin and its death warrant signed on the bench at Nuremberg.” That’s Milton Mayer, writing in a foreword to the 1966 edition of *They Thought They Were Free*. He’s right about the critics: the book was a finalist for the National Book Award in 1956. General readers may have been slower to take notice, but over time they did—what we’ve seen over decades is that any time people, across the political spectrum, start to feel that freedom is threatened, the book experiences a ripple of word-of-mouth interest. And that interest has never been more prominent or potent than what we’ve seen in the past year. *They Thought They Were Free* is an eloquent and provocative examination of the development of fascism in Germany. Mayer’s book is a study of ten Germans and their lives from 1933-45, based on interviews he conducted after the war when he lived in Germany. Mayer had a position as a research professor at the University of Frankfurt and lived in a nearby small Hessian town which he disguised with the name “Kronenberg.” “These ten men were not men of distinction,” Mayer noted, but they had been members of the Nazi Party; Mayer wanted to discover what had made them Nazis. His discussions with them of Nazism, the rise of the Reich, and mass complicity with evil became the backbone of this book, an indictment of the ordinary German that is all the more powerful for its refusal to let the rest of us pretend that our moment, our society, our country are fundamentally immune. A new foreword to this edition by eminent historian of the Reich Richard J. Evans puts the book in historical and contemporary context. We live in an age of fervid politics and hyperbolic rhetoric. *They Thought They Were Free* cuts through that, revealing instead the slow, quiet accretions of change, complicity, and abdication of moral authority that quietly mark the rise of evil.

**De Stijl** May 13 2021 The ideas that later had such a marked influence on the architecture of Walter Gropius and others of the Bauhaus movement, and subsequently on commercial art and graphic design, were first advocated by the Dutch magazine *De Stijl*.

**Richard Neutra, 1892-1970** Apr 11 2021 The quintessential California Modernist “The

continual refinement of human knowledge of the body and soul came to be one and the same thing for me, and the architecture of human living space its most necessary application and valuation." Richard Neutra Born and raised in Vienna, Richard Neutra (1872-1970) came to America early in his career, settling in California. His influence on post-war architecture is undisputed, the sunny climate and rich landscape being particularly suited to his cool, sleek modern style. Neutra had a keen appreciation for the relationship between people and nature; his trademark plate glass walls and ceilings which turn into deep overhangs have the effect of connecting the indoors with the outdoors. Neutra's ability to incorporate technology, aesthetics, science, and nature into his designs him recognition as one of Modernist architecture's greatest talents. About the Series: Each book in TASCHEN's Basic Architecture Series features: an introduction to the life and work of the architect the major works in chronological order information about the clients, architectural preconditions as well as construction problems and resolutions a list of all the selected works and a map indicating the locations of the best and most famous buildings approximately 120 illustrations (photographs, sketches, drafts and plans)
