A Legend for the Legendary Oct 18 2021 The origins of baseball are controversial. James A. Vlasich discusses the debates between two men intimately involved in nineteenth-century baseball, Henry Chadwick and Albert G. Spalding. Abner Graves of the Mills Commission claimed that Abner Doubleday had invented the game and he had done it in Cooperstown, New York. This claim was scrutinized at the time but the myth became etched into baseball history. Through the years, however, some critics have questioned the Mills Commission report. The problem is that the Baseball Hall of Fame is built on this shaky foundation. The lack of diligence on the part of Spalding's self-appointed committee has led to a credibility gap for the baseball shrine that continues a half century after its dedication. Indeed, the story of the building of the Baseball Hall of Fame is filled with intrigue worthy of a political thriller.

Gas Turbines May 13 2021 Covering basic theory, components, installation, maintenance, manufacturing, regulation and industry developments, *Gas Turbines: A Handbook of Air, Sea and Land Applications* is a broad-based introductory reference designed to give you the knowledge needed to succeed in the gas turbine industry, land, sea and air applications. Providing the big picture view that other detailed, data-focused resources lack, this book has a strong focus on the information needed to effectively decision-make and plan gas turbine system use for particular applications, taking into consideration not only operational requirements but long-term life-cycle costs in upkeep, repair and future use. With concise, easily digestible overviews of all important theoretical bases and a practical focus throughout, *Gas Turbines* is an ideal handbook for those new to the field or in the early stages of their career, as well as more experienced engineers looking for a reliable, one-stop reference that covers the breadth of the field. Covers installation, maintenance, manufacturer's specifications, performance criteria and future trends, offering a rounded view of the area that takes in technical detail as well as industry economics and outlook Updated with the latest industry developments, including new emission and efficiency regulations and their impact on gas turbine technology Over 300 pages of new/revised content, including new sections on microturbines, non-conventional fuel sources for microturbines, emissions, major developments in aircraft engines, use of coal gas and superheated steam, and new case histories throughout highlighting component improvements in all systems and sub-systems.

June 2022 - Surplus Record Machinery & Equipment Directory Jun 25 2022 SURPLUS RECORD, is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 95,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD. June 2022 issue. Vol. 99, No. 6

Railway Mechanical Engineer Jun 13 2021

The Moral Center Dec 20 2021 A "new liberal with old values" argues nothing is the matter with Kansas—and that the Democratic party needs to lead America out of its moral crisis (*The New York Times*). In this insightful book, the author of *The Cheating Culture* addresses the anxieties that many Americans share, pointing out that the problems most people care about are not hot-button partisan issues like abortion and gay marriage, but rather deeper subjects that neither party is addressing—the selfishness that is careening out of control, the effect of our violent and consumerist culture on children, and our lack of a greater purpose. As Republicans veer into zealotry, liberals can find common ground with the moderate majority. But to achieve electoral victories, they need a powerful new vision. In *The Moral Center*, David Callahan articulates that vision—and offers an escape from the dead-end culture war. With insights garnered from in-depth research and interviews, he examines some of our most polarized conflicts and presents unexpected solutions that lay out a new road map to the American center. "Brilliant, challenging, practical and hopeful." —E. J. Dionne Jr., author of *Why Americans Hate Politics* "Callahan shows why progressives often seem not to have such a [moral] center, ceding values to the Right, and why they need to get one to win the political battle." —Benjamin R. Barber, author of *Consumed and Jihad vs. McWorld* "Callahan wants . . . to create a new public morality that is concerned about both poverty and video game violence, both wages and rap lyrics. He wants to soften the jagged edges of the culture wars." —Michael Tomasky, *The New York Review of Books*
