Black walnut has been felled indiscriminately for timber for everything from fine furniture to rifle stocks. But few know that it is really an extraordinary perennial oil-crop (as are most nut trees to varying degrees). The author takes you on a journey into biomass nut production. With the focus on his style of management, he examines the components of volume output and the internal rate of return to investment in a nut-based enterprise. Above all, the author suggests that the reforestation of the landscape with non-select black walnut for biomass nut production has the potential for sustainable multiple income streams for long-term partial rural livelihoods. Operator of a farm with more than 2,000 black walnut

trees, the author uses his everyday interaction with his 'forest' to draw out the experiences that shape productivity, and provide ecosystem services in so doing. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week. Civil wars are the dominant form of violence in the contemporary international system, yet they are anything but local affairs. This book explores the border-crossing features of such wars by bringing together insights from international relations theory, sociology, and transnational politics with a rich comparative-quantitative literature. It highlights the causal mechanisms - framing, resource mobilization, socialization,

among others - that link the international and transnational to the local, emphasizing the methods required to measure them. Contributors examine specific mechanisms leading to particular outcomes in civil conflicts ranging from Chechnya, to Afghanistan, to Sudan, to Turkey. *Transnational Dynamics of Civil War* thus provides a significant contribution to debates motivating the broader move to mechanism-based forms of explanation, and will engage students and researchers of international relations, comparative politics, and conflict processes. Many authors have alluded to the unique nature of Russia's dual transition and its difficult task of simultaneously reforming its economy and polity. But there is in fact a third transition still far from completed that is of no less importance, the need to reconfigure central-regional relations and to create a stable and viable form of federalism. There are vast economic, demographic and political variations across the Russian federation. Therefore an understanding of regions, and the causes and consequences of cross-regional diversity, is a vitally important dimension of Russian politics that should not be overlooked. It is only by studying regional level politics that we can gain a full understanding of the complexities of Russia's protracted transition. This edited volume examines regional politics and centre-regional relations over the period 2000-2010, including the most recent developments which have taken place under the new dual leadership of Medvedev and Putin. All eight chapters have been written by leading experts in the field of Russian politics. In addition to chapters on regional elections, parties, regional governors and local politics, there are three chapters devoted to the important developments which are currently taking place in the Caucasus. This book was published as a special issue of *Europe-Asia Studies*. The introduction and rapid spread of two Eurasian mussel species, *Dreissena polymorpha* (zebra mussel) and *Dreissena rostriformis bugensis* (quagga mussel), in waters of North America has caused great concern among industrial and recreational water users. These invasive species can create substantial problems for raw water users such as water treatment facilities and power plants, and they can have other negative impacts by altering aquatic environments. In the 20 years since the first edition of this book was published, zebra mussels have continued to spread, and quagga mussels have become the greater threat in the Great Lakes, in deep regions of large lakes, and in the southwestern United States. Quagga mussels have also expanded greatly in eastern and western Europe since the first book edition was published. *Quagga and Zebra Mussels: Biology, Impacts, and Control, Second Edition* provides a broad view of the zebra/quagga mussel issue, offering a historic perspective and up-to-date information on mussel research. Comprising 48 chapters, this second edition includes reviews of mussel morphology, physiology, and behavior. It details mussel distribution and spread

in Europe and across North America, and examines policy and regulatory responses, management strategies, and mitigation efforts. In addition, this book provides extensive coverage of the impact of invasive mussel species on freshwater ecosystems, including effects on water clarity, phytoplankton, water quality, food web changes, and consequences to other aquatic fauna. It also reviews and offers new insights on how zebra and quagga mussels respond and adapt to varying environmental conditions. This new edition includes seven video clips that complement chapter text and, through visual documentation, provide a greater understanding of mussel behavior and distribution.

The objective of the 2014 International Conference on Computer, Network Security and Communication Engineering (CNSCE2014) is to provide a platform for all researchers in the field of Computer, Network Security and Communication Engineering to share the most advanced knowledge from both academic and industrial world, to communicate with each other about their experience and most up-to-date research achievements, and to discuss issues and future prospects in these fields. As an international conference mixed with academia and industry, CNSCE2014 provides attendees not only the free exchange of ideas and challenges faced by these two key stakeholders and encourage future collaboration between members of these groups but also a good opportunity to make friends with scholars around the world. As the first session of the international conference on CNSCE, it covers topics related to Computer, Network Security and Communication Engineering. CNSCE2014 has attracted many scholars, researchers and practitioners in these fields from various countries. They take this chance to get together, sharing their latest research achievements with each other. It has also achieved great success by its unique characteristics and strong academic atmosphere as well as its authority.

Pieter Coecke van Aelst (1502 – 1550) was renowned throughout Renaissance Europe as a draftsman, painter, and publisher of architectural treatises. The magnificent tapestries he designed were acquired by the wealthiest clients of the day, up to and including rulers such as Emperor Charles V, King Francis I of France, King Henry VIII of England, and Grand Duke Cosimo I de' Medici of Tuscany. At the same time, Coecke was remarkable not only for the complexity and unparalleled quality of his tapestries, but also for his fluency in various media: this lavishly illustrated volume examines the full range of his work, from tapestry and stained-glass window designs to panel paintings, prints, drawings, and architectural treatises. Though only forty-eight when he died, Coecke was one of the greatest Netherlandish artists of the sixteenth century. His paintings and drawings, initially wrought in the style of the Antwerp Mannerists, evolved through his enthusiastic response to Italian Renaissance design, and influenced generations of artists in his wake. This comprehensive study explores Coecke's stylistic

development, as well as his substantial contribution to the body of great Renaissance art in Flanders. Featuring twenty monumental tapestries, along with many of their cartoons and preparatory sketches, plus seven paintings, additional drawings, and printed matter—many of them newly photographed for this volume—Grand Design provides a thorough reappraisal of Coecke's work, amply justifying the high regard in which Coecke's work was held and its wide dissemination long after his death.

The key question this book addresses is how to identify and create optimal conditions for the kind of learning and development that is especially important for effectively functioning in the 21st century. Taking a new approach to this long-debated issue, it looks at how a design research-based science of learning (with its practical models and related design research) can provide insights and integrated models of how human beings actually function and grow in the social dynamics of educational settings with all their affordances and constraints. More specifically: How can specific domains or subject matters be taught for broad intellectual development? How can technology be integrated in enhancing human functioning? How can the social organization of classroom learning be optimized to create social norms for promoting deep intellectual engagement and personal growth? Part I is concerned with broad conceptual and technical issues regarding cultivating intellectual potential, with a focus on how design research might fill in an important a niche in addressing these issues. Part II presents specific design work in terms of design principles, models, and prototypes. This bulletin presents announcements of official rulings and procedures, treasury decisions, executive orders, tax conventions, legislation, and court decisions. It also contains other items of general interest intended to promote a uniform application of the tax laws. A comprehensive and path-breaking study of what happens behind the scenes before presidents publicly announce to the Senate--and, thus, the nation--their nominees for federal positions. The Realities of the International Criminal Justice System takes an analytical and critical look at the

impact of the major instruments of international criminal justice since the 1990s with the advent of the International Criminal Tribunals for Rwanda and Yugoslavia. This book argues against a perceptual theory of emotions, which sees emotions as perception-like states that help us gain evaluative knowledge, and argues for a caring-based theory of emotions, which sees emotions as felt desires or desire satisfactions, both of which arise out of caring about something. Professor Sathe is a great gift, a passionate teacher who cares deeply about the life arc of each individual student. In his vibrant classroom, he translates strategic management into a personal discipline—and here in these pages, he brings to you and me the benefits of his wise mentorship. —Jim Collins, author of Good to Great This book gives the reader the keys to survival and success as his or her career progresses from one job to the next in the same, or a different, organization—be it for-profit, non-profit, government, or volunteer. It is designed to help the reader avoid the many traps and pitfalls encountered along his or her career path and to help facilitate increased personal effectiveness during all three stages of the job cycle—interviewing, new hire, and long-term employment. Whether preparing to enter the workforce for the first time or in early, middle, or later career stages, this book will show the reader how to avoid jobs and organizations that are not a good fit. It will also go beyond survival and show how to achieve success by doing the job well and making other contributions to the organization in ways that improve job performance, satisfaction, happiness, and personal and professional growth. The keys this book provides will work whether the reader is an independent contributor, a manager responsible for the work of others, or an executive responsible for the enterprise. Organizational leaders, human resource professionals, career coaches, and mentors can also utilize this book to educate and train employees to be more productive at work and happy in their worklife.
