For hundreds of years, psychology has looked into the dysfunctions and symptoms of the mind. It's only over the last few decades that the field has started to pay attention to what constitutes a functional and content life. Instead of using disease to understand health, positive psychology studies the components of a good life and helps people not only avoid mental health problems but develop happiness. The work done in positive psychology is now at a point where applications are being developed in positive psychotherapy and extended to those with psychiatric diagnoses in positive psychiatry. While these fields are a recent development they hold the promise of helping all of us live a fulfilled life. Medicine in general, and psychiatry in particular, suffers from a worldview that is symptom- and deficit-oriented. By adopting a positive approach, psychology, psychotherapy, and psychiatry add a more holistic, integrative, resource oriented, and preventive perspective. There is great urgency in developing resources and potentials in our patients, not only freeing them from their disorders. Psychiatrists and psychotherapists alike are incorporating these positive tools into their practices with positive clinical outcomes. Standing on the shoulders of pioneers like Nossrat Peseschkian, in positive psychotherapy, and Dilip Jeste, in positive psychiatry, this textbook is the first to bring together these innovations in one volume that will serve as an excellent resource for medical

professionals looking to reap the benefits gained by the studies in these areas. Currently, the majority of texts that are available are targeting psychologists and researchers, whereas this book seeks to use positive psychology as the foundation on which the clinical applications are built. As such, this book will be of interest to psychiatrists, psychologists, social workers, and other mental health professionals. It may be used in educating a new generation of mental health professionals in these tenets that are expanding the reach of psychology, the practice of psychotherapy, and the scope of psychiatry. The book "Chapter-wise Daily Practice Problem (DPP) Sheets for Chemistry NEET" contains: 1. Carefully selected Questions (45 per DPP) in Chapter-wise DPP Sheets for Practice. 2. The book is divided into 30 Chapter-wise DPPs based on the NCERT. 3. Time Limit, Maximum Marks, Cutoff, Qualifying Score for each DPP Sheet is provided. 4. These sheets will act as an Ultimate tool for Concept Checking & Speed Building. 5. Collection of 1395 MCQ's of all variety of new pattern. 6. Covers all important Concepts of each Chapter. 7. As per latest pattern & syllabus of JEE Main exam. Explains how to do programming in Microsoft Offices with Visual Basic, applying it to documents, spreadsheets, and presentations The Feeling of Risk brings together the work of Paul Slovic, one of the world's leading analysts of risk, to describe the extension of risk perception research into the first decade of this new century. In this collection of important works, Paul Slovic explores the conception of 'risk as feelings' and examines the interaction of feeling and cognition in the perception of risk. He also examines the elements of knowledge, cognitive skill, and communication necessary for good decisions in the face of risk. The first section of the book looks at the difficulty of understanding risk without an emotional component, for example that disaster statistics lack emotion and thus fail to convey the true meaning of disasters and fail to motivate proper action to prevent them. The book also highlights other important perspectives on risk arising from cultural worldviews and concerns about specific hazards pertaining to blood transfusion, biotechnology, prescription drugs, smoking, terrorism, and nanotechnology. Following on from The Perception of Risk (2000), this book presents some of the most significant research on risk perception in recent years, providing essential lessons for all those involved in risk perception and communication.
