The Physician's Guide to Investing Jul 15 2021 I met Bob

Doroghazi when he dropped the first draft of his manuscript of *The Physician's Guide to Investing: A Practical Approach to Building Wealth* at my office. I will have to admit I was a bit skeptical: a physician writing a book on investments? During that first meeting with Bob, it became evident that he had been a successful physician and a successful investor, so I agreed to take a look at the book. I was in for a pleasant surprise. Bob's manuscript was easy to read and had specific advice useful to physicians, interspersed with lots of practical tidbits for any investor. Having written three college-level finance and investment texts, I was excited to be in on a project aimed at offering practical investment advice to a more general, yet specialized, audience. I had high expectations for the book and am pleased to say that I believe Bob has delivered a book that every physician interested in building wealth and protecting assets should read. Bob is a straight shooter; he tells it like he sees it in his book. Some doctors might be indignant on reading his statements, such as "Physicians sometimes have no idea of their limitations. This type of arrogance and ego can result in investing disaster." However, if you do have these limitations (and most professionals, even college professors, do), then reading Bob's book will help you recognize situations in which they can lead to poor investment decisions.

Terry Pratchett's Discworld 2016 Diary Jan 09 2021 One part diary, one part guide to the arcane practices of the funniest creation in modern fantasy, 100% Discworld goodness. With their trademark mix of cultural ephemera, background detail and hilarious one-liners, the Discworld diaries are back. And 2016's diary gives a long-awaited insight into the wit and wisdom of some of the Discworld's most-loved characters, the Witches. Or, as Granny Weatherwax puts it: "I don't hold with diaries. If a witch don't know where she's been or where she should be, no amount of writing it down in long and diverse letters will make any difference. There are some who say that making a note of birthdays and the like will mean you get a lot of presents but I think Gytha is wrong. But suit yourself. Personally I can't be doing with it." ~ Esme Weatherwax

Bluffer's Guide to the Quantum Universe Sep 04 2020 Instantly acquire all the knowledge you need to pass as an expert in the world of quantum physics from Bluffer's Guide to the Quantum Universe. Never again confuse a boson with a hadron, a fermion with a meson, or a photon with a lepton or an electron. If in doubt, always fall back on a bluffon. Bask in the admiration of your fellow physicists as you pronounce confidently on the theories of superstrings and entanglement, and hold your own in any discussion about Schrödinger's Cat. And in moments of uncertainty always resort to the tried and tested rejoinder: 'They're addressing that at CERN.'

The Enchantment of Sociology Jul 03 2020 A unique study of the link between theology and culture from a sociological perspective which addresses the issue of the pursuit of enchantment in the context of postmodernity. Sociology is applied to sociology itself to discern its own domestic response to theological readings of culture. A novel reading of Simmel, Bourdieu and Weber in relation to the Swiss Catholic theologian, Hans Urs von Balthasar, produces a controversial critique of assumptions regarding religious belief in the context of debates on secularisation and postmodernity.

Critical Care Transport Jan 01 2023 Welcome to the new gold standard in critical care transport training. Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), *Critical Care Transport* offers cutting edge content relevant to any healthcare provider training in critical care transport. Like no other textbook in this market, *Critical Care Transport* thoroughly prepares medical professionals to function as competent members of a critical care team by covering the material that everyone—paramedics, nurses, physicians, and specialty crew—needs to know to operate effectively in the prehospital critical care environment. This book meets the curricula of major critical care training programs, including University of Maryland, Baltimore County (UMBC). It covers both ground and flight transport, and meets the objectives of critical care transport certification exams such as the Certified Flight Paramedic (FP-C) exam administered by the Board for Critical Care Transport Paramedic Certification. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, trauma, and pharmacology are covered in the context of critical care. Chapters have been authored by leading critical care professionals across the country and represent the most current, state-of-the-art information on management of critical care patients.

Currency of War Aug 23 2019 The Solar League, humanity's empire, has existed since mankind reached for the stars. While the humans considered it the pinnacle of human achievement, for the subjugated alien races it seemed only to endorse humanity's worst impulses. But the worst of humanity pales in comparison to an alien onslaught that is on the verge of bringing mankind down into death and subjugation. Thracius "Tracy" Belmanor helps lead the Solar League's desperate defense against this new alien threat while the Empress of the Solar League, Mercedes, tries to keep the League from tearing apart. However, neither is prepared for the questions that need to be answered to save mankind and all of the human and non-human citizens of the League. Is humanity redeemable? Can the League reform into something better? Tracy and Mercedes must ask these questions of themselves and then decide the future of humanity while facing betrayals, ambition, and secrets that may bring about a dark age for the galaxy.

The Basics of Geomorphology Aug 16 2021 "I can think of no better guides than Professors Ken Gregory and John Lewin to lead the reader through the conceptual basis of this exciting science." - Victor R. Baker, University of Arizona "A very readable and informative introduction to the discipline for senior undergraduates, postgraduates and researchers." - Angela Gurnell, Queen Mary University of London "Time will tell, but this book may well mark a turning point in the way students and scientists alike perceive Earth surface processes and landforms." - Jonathan Phillips, University of Kentucky This student focused book provides a detailed description and analysis of the key concepts, ideas, and hypotheses that inform geomorphology. Kenneth Gregory and John Lewin explain the basics of landform science in 20 concepts, each the subject of a substantive, cross-referenced entry. They use the idea of the 'geomorphic system' to organise entries in four sections, with extensive web resources provided for each: System Contexts: The Systems Approach / Uniformitarianism / Landform / Form, Process and Materials / Equilibrium / Complexity and Non Linear

Dynamical Systems System Functioning: Cycles and cascades / Force-Resistance / Geomorphic work / Process Form Models System Adjustments: Timescales / Forcings / Change Trajectories / Inheritance and Sensitivity / Anthropocene Drivers for the Future: Geomorphic Hazards / Geomorphic Engineering / Design and Prediction Aligned with the teaching literature, this innovative text provides a fully-functioning learning environment for study, revision, and even self-directed research for both undergraduate and postgraduate students of geomorphology.

The International Journal of Technology, Knowledge and Society
Sep 24 2019 The International Journal of Technology, Knowledge and Society creates a place for the publication presenting innovative theories and practices relating technology to society. It is cross-disciplinary in its scope and provides a meeting point for technologists with a concern for the social and social scientists with a concern for the technological. The focus is primarily, but not exclusively, on information and communications technologies. Equally interested in the mechanics of social technologies and the social impact of technologies, the journal is guided by the ideals of an open society, where technology is used to address human needs and serve community interests. These concerns are grounded in the values of creativity, innovation, access, equity and personal and community autonomy. In this space, commercial and community interests at times complement each other; at other times they appear to be at loggerheads. The journal will examine the nature of the new technologies, their connection with community, their use as tools for learning, and their place in a 'knowledge society'. The perspectives presented range from big picture analyses which address global and universal concerns, to detailed case studies which speak of localised social applications of technology. The papers traverse a broad terrain, sometimes technically and other times socially oriented, sometimes theoretical and other times practical in their perspective, and sometimes reflecting dispassionate analysis whilst at other times suggesting interested strategies for action. The journal is relevant for academics in the fields of informatics, computer science, history and philosophy of science, sociology of knowledge, sociology of technology, education, management and the humanities; research students; technology developers and trainers and industry consultants. The International Journal of Technology, Knowledge and Society is

peer-reviewed, supported by rigorous, criterion-referenced article ranking and qualitative commentary processes, ensuring that only intellectual work of significance is published.

The Privatization of Space Exploration Dec 20 2021 Space was at the center of America's imagination in the 1960s. President John F. Kennedy's visionary statement captured the mood of the day: "We choose to go to the moon in this decade and do the other things, not because they are easy, but because they are hard." The Apollo mission's success in July 1969 made almost anything seem possible, but the Cold War made space flight the province of governmental agencies in the United States. When the Apollo program ended in 1972, space lost its hold on the public interest, as the great achievements wound down. Entrepreneurs are beginning to pick up the slack—looking for safer, more reliable, and more cost effective ways of exploring space. Entrepreneurial activity may make create a renaissance in human spaceflight. The private sector can energize the quest for space exploration and shape the race for the final frontier. Space entrepreneurs and private sector firms are making significant innovations in space travel. They have plans for future tourism in space and safer shuttles. Solomon details current US and international laws dealing with space use, settlement, and exploration, and offers policy recommendations to facilitate privatization. As private enterprise takes hold, it threatens to change the space landscape forever. Individuals are designing spacecraft, start-up companies are testing prototypes, and reservations are being taken for suborbital space flights. With for-profit enterprises carving out a new realm, it is entirely possible that space will one day be a sea of hotels and/or a repository of resources for big business. It is important that regulations are in place for this eventuality. These new developments have great importance, huge implications, and urgency for everyone.

Fushi no Kami: Rebuilding Civilization Starts With a Village
Volume 4 Nov 06 2020 After spending two years studying in Itsutsu city to bring back the life of convenience and abundance from the legends of the ancient civilization, Ash graduates from the military academy. He is now assigned to the newly established Territory Reform Promotion Office, where he works hard to improve this world's living standards. When it is brought to Ash's attention that Ajole, the hometown of his co-worker Renge's childhood friend, is on the verge of extinction, he decides to embark on a rescue mission. The inspection task force led by Ash and Maika encounters barren fields and skinny villagers. It appears that they have no choice but to break the taboo and use animal manure as compost. To make matters worse, there is news of another threat to the village: the demons known as treants! Can Ash find a way to save the village? This is the fourth chapter of the story about a young boy who sets out to revolutionize the world in order to rebuild civilization and create his ideal life!

Crest-Jewel of Wisdom (Vivekachudamani) Jan 27 2020 "Sankara's works, the manuals and catechisms for learners, are complete and perfect. They really teach, quite plainly and lucidly, the first steps on the path of wisdom; they point out, with clear insistence, the qualities that are necessary to make these first steps fruitful; qualities without which the learner may remain, hesitating and halting, on the threshold, through lack of the force and sterling moral worth which alone make any further progress possible. "The Crest-Jewel of Wisdom begins with these first steps on the path and ends with the complete teaching of Sankara's philosophy so far as that teaching can be put into words. His teaching is, briefly stated, this: The cause of the sorrow and suffering of mankind is a belief in the reality and isolated existence of the personal life. But the personality, with the fate of which each one of us identifies himself, has no real existence; it is nothing but an image of the body in the

mind, and its sufferings are imaginary. Its original cause is the "beginningless, ineffable unwisdom" of separation; and this illusion of isolated being is dispelled by an insight, which we may well call illumination, or inspiration. When the false self is dispelled, Sankara tells us, the real Self rises in the heart, as the sun shines out when the clouds are dispersed."-Charles Johnston

The "Hitchhiker's Guide to the Galaxy" Revisited: Motifs of Science Fiction and Social Criticism Oct 18 2021 This book is a survey of typical Science Fiction elements in Douglas Adams's *Hitchhiker's Guide to the Galaxy*. Christian Erkenbrecher first goes through a short history of Science Fiction and identifies certain motifs of the genre in order to correctly place the novel within a useful context. Classical elements of the Science Fiction canon are identified in the novel and scrutinized. It becomes clear that Douglas Adams was fully aware of the SF "burden" and we can see how its elements are used in order to create both humour and criticism. The question of whether social criticism can be applied purposefully in SF will be asked. Other big questions which are posed (and answered?) in *Hitchhikers* are also taken into consideration: Is there a god? Will the breakdown of communication barriers between races put an end to all wars? Can the advancement of technology prevent us from destroying ourselves? Follow the author on his way through Douglas Adams's "wholly remarkable book" and see how this exceptional hitchhiking playwright and atheist writer enriched the world with his unique prose.
