Public Examinations Examined Jan 08 2021 High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations." Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

The 1989 FAO Standard Specifications for the Marking and Identification of Fishing Vessels: Use and options for review Sep 23 2019 The marking of fishing vessels is important for their identification, to support the global efforts to promote sustainable fisheries, for safety at sea and to combat illegal, unreported and unregulated fishing. For this reason, the FAO Standard Specifications for the Marking and Identification of Fishing Vessels were developed and endorsed by COFI in 1989 as a voluntary instrument providing a standardized system for the identification of fishing vessels operating, or likely to operate, in waters of another State. Global developments have had an impact on the usefulness of the FAO Standard Specifications, specifically the increased use of the International Maritime Organization number as a unique vessel identifier and the establishment of the FAO's Global Record. This document provides background to the development of the FAO Standard Specifications and the results of a study to assess the level of their adoption at the national, regional and international levels. It also describes progress in the areas of vessel identity, vessel tracking, different vessel types and catch traceability and how these impact the usefulness of the FAO Standard Specifications. Finally, the document proposes a review and update of the FAO Standard Specifications.

Challenges in Language Testing Around the World Feb 06 2021 This book combines insights from language assessment literacy and critical language testing through critical analyses and research about challenges in language assessment around the world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers-in-training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real-world language use.

Energy Efficiency Financing and Market-Based Instruments Jan 26 2020 This book is devoted to investigating the policy design and effectiveness of financial and market-based instruments to promote energy efficiency financing. The concept of this monograph is to present the latest results related to energy efficiency funding schemes, energy efficiency obligations, voluntary agreements, auction mechanisms, and Super Energy Services Companies (Super ESCOs) in major jurisdictions across the world. The book focuses on financial and market-based instruments as they deliver a price signal, which provides an incentive for firms to invest in innovation or implement more energy-efficient technologies and deliver energy savings while minimizing costs. Such instruments can have significant advantages for the government, supporting the fiscal sustainability of the government's energy efficiency efforts, requiring less enforcement than regulation and according the market flexibility to select the most cost-efficient technologies. This book is highly recommended to researchers, policy experts, and business specialists who seek an in-depth and up-to-date integrated overview of energy efficiency financing.

Capstone: Inquiry & Action at School Sep 03 2020 Capstone: Inquiry & Action at School addresses the what, why, and how of capstone education. Capstone programs are modern rituals that give meaning back to "schooling" and create transformative relationships between students and teachers. Capstone programs energize schools and can point the way for institutional change. Written by teachers for teachers, Capstone contains ready-to-implement materials derived from decades of experience in the classroom. The authors share authentic narratives of failure and success to encourage teachers who are engaged in the risks and rewards of deep learning. Capstone is implementable. Capstone offers concrete tips and templates for teachers. Capstone collects in one place all the resources a teacher needs to build a program from the ground up. Capstone is compelling. Written by teachers, Capstone communicates through a shared experience of the classroom. Capstone offers support for teachers who are committed to authentic student learning. Capstone is connected. Capstone shares emerging practices being developed by current capstone educators and informed by the collected wisdom of the National Capstone Consortium.

Energy Efficiency Dec 31 2022 Energy risk has reappeared on the corporate and social agenda with a bang and the complexity of the issues has increased many-fold since the days of the last great wave of concern following the oil crises of the 1970s. Steven Fawkes' Energy Efficiency is a comprehensive guide for managers and policy-makers to the fundamental questions underpinning energy-efficiency and our responses to it: ¢ what do we really mean by energy efficiency? ¢ what is the potential (in different dimensions)? ¢ why it is important? ¢ what management processes lead to optimisation of energy efficiency? ¢ what technologies are useful for improving energy efficiency? ¢ what policies can be used to promote energy efficiency? ¢ how can energy efficiency be financed? ¢ how can energy suppliers engage with energy efficiency? The result is the most comprehensive review to-date of the barriers and opportunities associated with improving energy efficiency. Clearly written and erudite, Steven Fawkes addresses every aspect of energy efficiency, including the huge and vitally important untapped potential offered by effective energy management and the

application of existing technology. He also identifies barriers, such as the rebound effect and how they can be mitigated and he provides a comprehensive review of innovative energy efficiency financing options. This book is a 'must read' for anyone with an interest in energy supply and demand reduction.

The Oxford Handbook of Industrial Hubs and Economic Development Oct 05 2020 Industrialization supported by industrial hubs has been widely associated with structural transformation and catch-up. But while the direct economic benefits of industrial hubs are significant, their value lies first and foremost in their contribution as incubators of industrialization, production and technological capability, and innovation. The Oxford Handbook of Industrial Hubs and Economic Development adopts an interdisciplinary approach to examine the conceptual underpinnings, review empirical evidence of regions and economies, and extract pertinent lessons for policy reasearchers and practitioners on the key drivers of success and failure for industrial hubs. This Handbook illustrates the diverse and complex nature of industrial hubs and shows how they promote industrialization, economic structural transformation, and technological catch-up. It explores the implications of emerging issues and trends such as environmental protection and sustainability, technological advancement, shifts in the global economy, and urbanization.

The book is useful for student journalists and media professionals; for those whose interests or careers are closely related with journalism, media and public relations; and for those who want to know and report on India, or from Bharat, or out of Hindustan. KEY FEATURES • Highly useful and informative • Covers all platforms of journalism and media: newspapers, magazines, radio, television and Internet • A Journalism and Media Calendar at the end • Reference to news items, published in real newspapers/websites

Universities and Innovation Economies Aug 03 2020 Students drop out of universities in large numbers, many graduate to jobs that do not require a degree and a large number learn little at university, whilst graduate salaries have shrunk over time and student loan debt and default have grown. University research achievements have declined while university administration has expanded massively. The contemporary university is mired in auditing, regulation, waste and aimlessness and its contribution to serious social innovation has deteriorated markedly. The miserable state of the universities reflects a larger social reality, as bureaucratic capitalism has replaced creative capitalism. *Universities and Innovation Economies* examines the rise and fall of the mass university and post-industrial society, considering how we might revitalize economic and intellectual creativity. Looking to a much more inventive social and economic paradigm to drive long-term growth, the author argues for a smaller, leaner, more effective university model - one capable of delivering a greater degree of high-level discovery and creative power. A potent critique of the post-industrial mass university that urges a reimagining of universities as places of discovery and invention, this book will appeal to readers interested in higher education, creativity, social theory, the sociology of work and organisations, political economy, pedagogy and public policy.

Studies on the Teaching of Asian Languages in the 21st Century May 31 2020 In recent years, there has been an increasing demand for, and rapid development in, the learning and teaching of Asian languages as a foreign language throughout the world. Many governments recognize that Asian languages are of strategic economic importance, and thus they are now offered as a foreign language by a great number of schools and higher education institutions. This book contains chapters written by different authors from several countries on key issues and problems in the teaching of the Chinese, Russian, Farsi, Japanese and Malaysian languages, and some comparative studies. The contributors here explore future directions in the teaching of Asian languages in the 21st century. The ten chapters of the book have been prepared by the authors using the scholarly papers they presented at the Second International Symposium on Asian Languages and Literatures (ADES), which was held on 3-4 May 2012 at Erciyes University, Kayseri, Turkey, under the title of "Teaching of Asian Languages in the 21st Century".

Organizational Change for Corporate Sustainability Apr 30 2020 Since this classic book was first published in 2003, sustainability has increasingly become mainstream business for leading

corporations, whilst the topic itself has also been a hotly debated political issue across the globe. The sustainability phase models originally discussed in the book have become more relevant with ever more examples of organizations at later stages in the development of corporate sustainability. Bringing together global issues of ecological sustainability, strategic human resource management, organizational change, corporate social responsibility, leadership and community renewal, this new edition of the book further develops its unified approach to corporate sustainability and its plan of action to bring about corporate change. It integrates new research and brings illustrative case studies up to date to reflect how new approaches affect change and leadership. For the first time, a new positive model of a future sustainable world is included - strengthened by references to the global financial crisis, burgeoning world population numbers and the rise of China. With new case studies including BP's Gulf oil spill and Tokyo Electric Company's nuclear reactor disaster, this new edition will again be core reading for students and researchers of sustainability and business, organizational change and corporate social responsibility.
