**Greetings from Sandy Beach** Jan 27 2020

**Use Your Brain** Dec 20 2021 Describes how the brain receives and sends messages via the nervous system.

**Let's Read** Sep 28 2022 Let's Read is a simple and systematic way to teach basic reading. Developed by noted linguist Leonard Bloomfield, the book is based on the alphabetic spelling patterns of English. Bloomfield offered an antidote to the idea that English is a difficult language to learn to read by teaching the learner to decode the phonemic sound-letter correlations of the language in a sequential, logical progression of lessons based on its spelling patterns. The learner is first introduced to the most consistent (alphabetic) vocabulary and then to increasingly less alphabetic and less frequent spelling patterns within a vocabulary of about 5,000 words.

**Numerical Street** Dec 28 2019 'Starting with 1, begin in the park: Count up the street and get home before dark.' From the creators of the bestselling Alphabetical Sydney comes a counting book set in a bright and quirky streetscape where there's always something new to find. Children will love the fun rhyming text that guides them as they hop, skip or jump up Numerical Street - past cake shops, hair stylists, laundromats, pet stores and shoe repairers, with all their curious objects on display.

**Let's Read About Snow** Feb 07 2021 Rhyming text introduces the snow.

**Let's Read About-- George Washington** Aug 28 2022 A simple biography of the first president of the United States.

**The Sun and the Moon** Jul 03 2020 Read and find out about the sun and the moon in this colorfully illustrated nonfiction picture book. The sun is out in the day and always has a circle shape. The moon's shape seems to change, and you can sometimes see it in the daytime and at night. What are the sun and the moon? How are they the same and how do they differ? Hop into your spaceship and find out! With beautiful illustrations and engaging text, The Sun and the Moon guides young readers into a deeper understanding of their observations of the sun and the moon. Featuring a find-out-more section with instructions on how to keep an observation log and how to make moon ice, a glossary of new terms, and web research prompts, this book will begin children's explorations of the sun and the moon. Recommended by Brightly as a favorite book for kids about astronomy: "This book even has a glossary and science experiments to offer kids a hands-on learning experience." Both the text and the artwork were vetted for accuracy by Bradley J. Thomson, Ph.D., Senior Research Scientist at the Boston University Center for Remote Sensing. This is a clear and appealing science book for early elementary age kids, both at home and in the classroom. It's a Level 1 Let's-Read-and-Find-Out, which means the book explores introductory concepts perfect for children in the primary grades. The 100+ titles in this leading nonfiction series are: hands-on and visual acclaimed and trusted great for classrooms Top 10 reasons to love LRFOs: Entertain and educate at the same time Have appealing, child-centered topics Developmentally appropriate for emerging readers Focused; answering questions instead of using survey approach Employ engaging picture book quality illustrations Use simple charts and graphics to improve visual literacy skills Feature hands-on activities to engage young scientists Meet national science education standards Written/illustrated by award-winning authors/illustrators & vetted by an expert in the field Over 130 titles in print, meeting a wide range of kids' scientific interests Books in this series support the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) standards. The 100+ titles in this leading nonfiction series are: hands-on and visual acclaimed and trusted great for classrooms Top 10 reasons to love LRFOs: Entertain and educate at the same time Have appealing, child-centered topics Developmentally appropriate for emerging readers Focused; answering questions instead of using survey approach Employ engaging picture book quality illustrations Use simple charts and graphics to improve visual literacy skills Feature hands-on activities to engage young scientists Meet national science education standards Written/illustrated by award-winning authors/illustrators & vetted by an expert in the field Over 130 titles in print, meeting a wide range of kids' scientific interests Books in this series support the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) standards. Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

**Let's Read about India** Jun 01 2020

**Let's Read About-- Ruby Bridges** Oct 30 2022 Ruby Bridges was born during the time of segregation in the South. In 1960, she made history when she attended an all-white school. Follow her story and learn why we still celebrate her courage today.

**Where the Forest Meets the Sea** Feb 28 2020 My father says there has been a forest here for over a hundred million years," Jeannie Baker's young protagonist tells us, and we follow him on a visit to this tropical rain forest in North Queensland, Australia. We walk with him among the ancient trees

as he pretends it is a time long ago, when extinct and rare animals lived in the forest and aboriginal children played there. But for how much longer will the forest still be there, he wonders? Jeannie Baker's lifelike collage illustrations take the reader on an extraordinary visual journey to an exotic, primeval wilderness, which like so many others is now being threatened by civilization.

*What's It Like to Be a Fish?* Mar 30 2020 How can fish live in water? Why don't they drown? The answer to this fishy question and more can be found in this latest addition to the Let's-Read-and-Find-Out Science series. The book clearly explains how a fish's body is perfectly suited to life underwater, just as our bodies are suited for life on land. 1996 'Pick of the Lists' (ABA) Best Children's Science Books 1995 (Science Books and Film)

**The Art of Words** Oct 25 2019 Words are everywhere! Come on this lively adventure to learn more about how they can be shortened, extended, and even switched around. Meet ugly words, colourful words, and words that just need a friend. The Art of Words is a unique, fun and interactive story about the magic of words. Two children and their adorable dog are illustrated playfully interacting with letters and words, and discovering myriad word functions and capabilities. Typography is a major feature and each page shows words that are scaled, coloured, and positioned to enhance their meaning and reflect the interplay of their verbal and visual aspects. At only 100 words, this 'language through adventure' book is intended to excite young children about language, especially the joy of words and their capabilities. Visually, it depicts an imaginative natural world with abundant greenery, stars, animals and flowers, and children engaging in sports, adventure and STEM! The illustrations aim to embrace and depict diversity in gender and race and cater to varied literacy levels. The font choices are simple and clear, to ensure beginning readers can engage confidently. Children, parents, carers and teachers alike will delight in this quirky celebration of the joy and power of words. Readers will come to appreciate the joy of making stories from words, and will be reminded that even books that teach can be fun!

**Follow the Water from Brook to Ocean** Nov 06 2020 Explains how water flows from brooks, to streams, to rivers, over waterfalls, through canyons and dams, to eventually reach the ocean.
