Residual Stress and Stress Relaxation Jul 19 2021 The Army Materials and Mechanics Research Center in cooperation with the Materials Science Group of the Department of Chemical Engineering and Materials Science of Syracuse University has been conducting the Annual Sagamore Army Materials Research Conference since 1954. The specific purpose of these conferences has been to bring together scientists and engineers from academic institutions, industry and government who are uniquely qualified to explore in depth a subject of importance to the Department of Defense, the Army and the scientific community. These proceedings, entitled RESIDUAL STRESS AND STRESS RELAXATION, address the nature of residual stresses and their measurements, the sources of residual stress, stress relaxation, sub-critical crack growth in the presence of residual stress, residual stresses and properties, and research in progress. We wish to acknowledge the assistance of Mr. Dan McNaught of the Army Materials and Mechanics Research Center and Mr. Robert J. Sell and Helen Brown DeMascio of Syracuse University throughout the stages of the conference planning and finally the publication of the book. The continued active interest and support of these conferences by Dr. E. Wright, Director of the Army Materials and Mechanics Research Center, is appreciated.

Aeronautical Engineering Aug 20 2021 A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports (STAR) and International aerospace abstracts (IAA)

Sufficiently Advanced Magic Jun 05 2020 Five years ago, Corin Cadence's brother entered the Serpent Spire -- a colossal tower with ever-shifting rooms, traps, and monsters. Those who survive the spire's trials return home with an attunement: a mark granting the bearer magical powers. According to legend, those few who reach the

top of the tower will be granted a boon by the spire's goddess. He never returned. Now, it's Corin's turn. He's headed to the top floor, on a mission to meet the goddess. If he can survive the trials, Corin will earn an attunement, but that won't be sufficient to survive the dangers on the upper levels. For that, he's going to need training, allies, and a lot of ingenuity. The journey won't be easy, but Corin won't stop until he gets his brother back.

Life Along the Illinois River Jan 31 2020 A panoramic collection of ninety photographs captures the spirit of people at work and play along the Illinois River, as well as the quiet beauty of the flora and fauna that make the river a natural retreat.

A Knife in the Heart Aug 27 2019 In this action-packed Hank Fallon western, the falsely imprisoned lawman finds himself holding the keys to one of America's most dangerous penitentiaries . . . Johnstone Country. Don't Be a Stranger. HE'S ALWAYS ON HIS GUARD As both a prisoner and an undercover operative, U.S. Marshal Hank Fallon has faced down some of the most vicious, terrifying, cold-blooded thieves and murderers in the West. Now, Hank is finally free and he's got no intention of setting foot inside a jail ever again. But the new federal prison being constructed in Leavenworth, Kansas, needs a warden and Hank is the right man for the job. He's got the scars to prove it—and to keep the peace. But keeping these lawless hornets in their nest is no easy feat. And when several escape before Leavenworth is at maximum security, they take Hank's family hostage. To save his wife and baby daughter, Hank will have to get as down and dirty as the devils he's pursuing—and they won't be taken alive. Live Free. Read Hard.

Corotating Interaction Regions Oct 10 2020 A Corotating Interaction Region (CIR) is the result of the interaction of fast solar wind with slower solar wind ahead. CIRs have a very large three-dimensional extent and are the dominant large-scale structure in the heliosphere on the declining and minimum phase of the solar activity cycle. Until recently, however, CIRs could only be observed close to the ecliptic plane, and their three-dimensional structure was therefore not obvious to observers and theoreticians alike. Ulysses was the first spacecraft allowing direct exploration of the third dimension of the heliosphere. Since 1992, when it has entered a polar orbit that takes it 0 up to 80 latitude, the spacecraft's performance has been flawless and the mission has provided excellent data from a superbly matched set of instruments. Perhaps the most exciting observation during Ulysses' first passage towards the south pole of the Sun was a strong and long lasting CIR whose energetic particle effects were observed up to unexpectedly high latitudes. These observations, documented in a number of publications, stimulated considerable new theoretical work.

[Nongovernmental Organizations in World Bank-supported Projects](#) Jan 13 2021 Nongovernmental organizations (NGOs) are important to the Bank because of the skills and resources they bring to emergency relief and development activities. In addition, they foster participation in the development process. The strength of the World Bank's collaboration with NGOs has grown since the late 1980s. In recognition of the added value that NGOs bring to Bank-supported projects, there have been intense efforts to include them. However, this report identifies a gap between promise and performance. The report concludes that the Bank's guidelines on working with NGOs are sound but that existing guidelines need to be used more effectively. The report makes recommendations to improve these partnerships and increase their benefit to development projects. It is written in English, French, and Spanish.

Scientific and Technical Aerospace Reports Sep 20 2021 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

Extremist Groups Jan 01 2020 This compendium of information on terrorist groups, violent international criminal gangs, and other extremist groups that have been or are currently operating is intended

for use as a reference guide and research tool for academics, students, government officials, security personnel, military personnel, law enforcement personnel, and the public. The publication also lists and describes political organizations and religious or ethnic factions that espouse violence or display the threat of violence in their philosophical or operational standards. The information was collected from a broad range of sources, including interviews with, law enforcement and military practitioners, researchers and academics, and and government officials. The organizations are listed geographically by continent and country. The listing for each organization covers its stated aims, ideology, or policy; areas of operation, numbers of active members, numbers of supporters, structure, headquarters, leaders' names, funding sources, types of activities, publications, network contacts, significant actions and activities, and trends.

Space Weather Aug 08 2020 The editors present a state-of-the-art overview on the Physics of Space Weather and its effects on technological and biological systems on the ground and in space. It opens with a general introduction on the subject, followed by a historical review on the major developments in the field of solar terrestrial relationships leading to its development into the up-to-date field of space weather. Specific emphasis is placed on the technological effects that have impacted society in the past century at

times of major solar activity. Chapter 2 summarizes key milestones, starting from the base of solar observations with classic telescopes up to recent space observations and new mission developments with EUV and X-ray telescopes (e.g., STEREO), yielding an unprecedented view of the sun-earth system. Chapter 3 provides a scientific summary of the present understanding of the physics of the sun-earth system based on the latest results from spacecraft designed to observe the Sun, the interplanetary medium and geospace. Chapter 4 describes how the plasma and magnetic field structure of the earth's magnetosphere is impacted by the variation of the solar and interplanetary conditions, providing the necessary science and technology background for missions in low and near earth's orbit. Chapter 5 elaborates the physics of the layer of the earth's upper atmosphere that is the cause of disruptions in radio-wave communications and GPS (Global Positioning System) errors, which is of crucial importance for projects like Galileo. In Chapters 6-10, the impacts of technology used up to now in space, on earth and on life are reviewed.

Hunger on the Stage May 05 2020 In his short story "The Hunger Artist," Kafka imagined the theatrical career of a "professional faster"

whose performance consists merely in displaying his own starving body before an avid audience. Kafka thus paradoxically suggested that hunger, mere emptiness working its way through declining bodies, may be a privileged theatrical object. Hunger often signals an anchorage in socio-historical reality, and invites extreme situations on stage, articulating large-scale cataclysms (famines, the devastation of war) with personal tragedies (hunger-strikes, anorexia, etc.) in which characters experience the tenuousness of their own lives. Whether in the comic or in the tragic mode, staged hunger metaphorizes various kinds of starvation - material greed, spiritual, emotional, sexual starvation, and even linguistic insufficiency. This volume explores the aesthetic and ethical issues raised by hunger on the stage in the English-speaking world. It investigates the paradox of the hypervisibility of the thinning body and shows how, throughout history, hunger has given shape to innovative, powerfully transgressive dramaturgies.
