The party as a model for new forms of togetherness, with examples from communist Hungary and Spain From social get-together to scenes of delirium, this publication aims to unpack the party as a complex, vertiginous construct that provides a dynamic view onto questions of community. If the party functions as an intensification of togetherness, what lessons might it provide in negotiating a given social order? This first volume on the topic considers the house party, and in what ways domestic space is reworked in support of an extension of the family unit. Including a series of interviews with those active in flat events in Budapest during the communist regime and today, essays on hospitality, the politics of rest, and erotic knowledge, and documentation on Sala 603, an informal house-theater in Curitiba. The publication is the first in a new Errant Bodies series developed in parallel to a set of party-workshops initiated by the artist Brandon LaBelle held in different locations in Madrid, each of which performatively investigates states of partying, posing the party as a scene of study. Only contributions from members of the Harvard Psychological Laboratory will be printed in these volumes, which will appear at irregular intervals. The Handbook of Modal Logic contains 20 articles, which collectively introduce contemporary modal logic, survey current research, and indicate the way in which the field is developing. The articles survey the field from a wide variety of perspectives: the underling theory is explored in depth, modern computational approaches are treated, and six major applications areas of modal logic (in Mathematics, Computer Science, Artificial Intelligence, Linguistics, Game Theory, and Philosophy) are surveyed. The book contains both well-written expository articles, suitable for beginners approaching the subject for the first time, and advanced articles, which will help those already familiar with the field to deepen their expertise. Please visit: http://people.uleth.ca/~woods/RedSeriesPromo_WP/PubSLPR.html - Compact modal logic reference - Computational approaches fully discussed - Contemporary applications of modal logic covered in depth (Southern Music). Incorporates the Rose studies for clarinet including: Fourty Studies (Books 1 & 2); Thirty-Two Studies (32) Etudes and Nine (9) Caprices. Oxford Studies in Medieval Philosophy showcases the best scholarly research in this flourishing field. The series covers all aspects of medieval philosophy, including the Latin, Arabic, and Hebrew traditions, and runs from the end of antiquity into the Renaissance. It publishes new work by leading scholars in the field, and combines historical scholarship with philosophical acuteness. The papers will address a wide range of topics, from political philosophy to ethics, and logic to metaphysics. OSMP is an essential resource for anyone working in the area. (String Method). For unaccompanied violin. Beloved for his 32 Rose Etudes for Clarinet book, C. Rose -- full name Chrysogone Cyrille Rose was an important French clarinetist, and served as principal clarinet at the Paris Opera. He was a teacher and composer of pedagogical material for the clarinet, much of which (like this 32 Etudes) is still widely in use today. Cyrille Rose was taught by Hyacinthe Klosé. He studied under Klosé at the Paris Conservatoire, winning the First Prize in 1847. He taught many famous clarinet players, such as: Louis Cahuzac, Paul Jean, Manuel Gomez, Francisco Gomez, Henri Lefèbvre, Henri Paradis, Henri Selmer, and Alexandre Selmer. The two volumes of The Oxford Handbook of Mobile Music Studies consolidate an area of scholarly inquiry that addresses how mechanical, electrical, and digital technologies and their corresponding economies of scale have rendered music and sound increasingly mobile-portable, fungible, and ubiquitous. At once a marketing term, a common mode of everyday-life performance, and an instigator of experimental aesthetics, "mobile music" opens up a space for studying the momentous transformations in the production, distribution, consumption, and experience of music and sound that took place between the late nineteenth and the early twenty-first centuries. Taken together, the two volumes cover a large swath of the world-the US, the UK, Japan, Brazil, Germany, Turkey, Mexico, France, China, Jamaica, Iraq, the Philippines, India, Sweden-and a similarly broad array of the musical and nonmusical sounds suffusing the soundscapes of mobility. Volume 1 provides an introduction to the study of mobile music through the examination of its devices, markets, and theories. Conceptualizing a long history of mobile music extending from the late nineteenth century to the present, the volume focuses on the conjunction of human mobility and forms of sound production and reproduction. The volume's chapters investigate the MP3, copyright law and digital downloading, music and cloud computing, the iPod, the transistor radio, the automated call center, sound and text messaging, the mobile phone, the militarization of iPod usage, the cochlear implant, the portable sound recorder, listening practices of schoolchildren and teenagers, the ringtone, mobile music in the urban soundscape, the boombox, mobile music marketing in Mexico and Brazil, music piracy in India, and online radio in Japan and the US. Critical Heritage Studies is a new and fast-growing interdisciplinary field of study seeking to explore power relations involved in the production and meaning-making of cultural heritage. Politics of Scale offers a global, multi- and interdisciplinary point of view to the scaled nature of heritage, and provides a theoretical discussion on scale as a social construct and a method in Critical Heritage

Studies. The international contributors provide examples and debates from a range of diverse countries, discuss how heritage and scale interact in current processes of heritage meaning-making, and explore heritage-scale relationship as a domain of politics. Current research increasingly highlights the role of early literacy in young children's development--and facilitates the growth of practices and policies that promote success among diverse learners. The Handbook of Early Literacy Research presents cutting-edge knowledge on all aspects of literacy learning in the preschool years. Volume 1 covers such essential topics as major theories of early literacy; writing development; understanding learning disabilities, including early intervention approaches; cultural and socioeconomic contexts of literacy development; and tutoring programs and other special intervention efforts. Creation Through the age of Discovery (6000 BC to AD 1500) Chronologically based, but focused more on skill development Meant to be a 20 to 30 minute experience every day World history is combined with social studies in a one-year course. The Jr. High School student will see history come to life no matter what their pace or ability. Developed by Dr. James Stobaugh, the courses grow in difficulty with each year, preparing students for high school work. This is a comprehensive examination of history, geography, economics, and government systems. This educational set equips students to learn from a starting point of God's creation of the world and move forward with a solid biblically-based worldview. Volume I Covers - The Fertile Crescent, Egypt, India, China, Japan, Greece, Christian history, and more. Futures studies is a new field of inquiry involving systematic and explicit thinking about alternative futures. It aims to demystify the future, make possibilities for the future more known to us, and increase human control over the future. This book summarizes and expands contributions of futurists to the envisioning power and well-being of humanity. Bell brings together futurist intellectual tools, describing and explaining not only the methods, but also the nature, concepts, theories, and exemplars of the field. Foundations of Futures Studies fulfills Bell's five main purposes for writing this two-volume effort: (1) to show that futures studies, like other fields from anthropology to zoology, exists as an identifiable sphere of intellectual activity; (2) to create a teaching instrument that can be used as a basic text for core courses in futures studies; (3) to futurize the thinking of specialists in other disciplines; (4) to contribute to the further development and improvement of futures studies; and (5) to provide tools to empower both ordinary people and leaders to act in ways that create better futures for themselves and their societies. Bell maintains that despite its sometimes doomsday rhetorical style and widespread use by special interests, futures studies offers hope for the future of humanity and concrete ways of realizing that hope in the real world of our everyday lives. It will appeal to all interested in futures studies, as well as sociologists, economists, political scientists, and historians. Music Sales America The four books are intended to be used by students taking BEd or PGCE courses and by teachers in service, taking diploma or higher degree courses in primary education. The material extracted can be used by tutors as a focus for seminars or as reading to back up lectures, and by students as a source for essays or as a starting point for further reading. The books are not intended to be read straight through from cover to cover but can be selectively and flexibly used at various stages in the course. For convenience, the extracts have been organized into a number of sections. Volume 1 comprises extracts which examine primary education from historical, ideological, philosophical, sociological and psychological perspectives. Volume 2 deals with curriculum studies, Volume 3 with school organization and management and Volume 4 with teaching and classroom studies. Because of limitations of space, primary education has been confined to the education of children aged 5 to 11, though the compilers acknowledge that in doing so they may offend those teachers in nursery or middle schools who regard themselves, justifiably, as primary practitioners. Mari Sandoz, born on Mirage Flats, south of Hay Springs, Nebraska, on May 11, 1896, was the eldest daughter of Swiss immigrants. She experienced firsthand the difficulties and pleasures of the family's remote plains existence and early on developed a strong desire to write. Her keen eye for detail combined with meticulous research enabled her to become one of the most valued authorities of her time on the history of the plains and the culture of Native Americans. Women in the Writings of Mari Sandoz is the first volume of the Sandoz Studies series, a collection of thematically grouped essays that feature writing by and about Mari Sandoz and her work. When Sandoz wrote about the women she knew and studied, she did not shy away from drawing attention to the sacrifices, hardships, and disappointments they endured to forge a life in the harsh plains environment. But she also wrote about moments of joy, friendship, and—for some—a connection to the land that encouraged them to carry on. The scholarly essays and writings of Sandoz contained in this book help place her work into broader contexts, enriching our understanding of her as an author and as a woman deeply connected to the Sandhills of Nebraska. Since the 1950s, globalization has been an increasingly irresistible trend and one that has exerted a tremendous impact on the political, economic, military, environmental, and social fortunes of mankind – and yet, the existing theories in humanities and social sciences have been fundamentally built upon the traditional “nation-state” model. These two volumes, a pioneering work on global studies to be published out of China, aims at creating a new theoretical framework against the backdrop of globalization. This volume introduces core concepts and critical issues, deploying globalization as a theoretical framework and redefining the interrelationship between politics, economics, law, and globality. The two volumes are an essential reference for scholars and students in politics, economics, international relations, and law. Methods for Consumer Research, Volume One: New Approaches to Classic Methods brings together world leading experts in global consumer research who provide a fully comprehensive state-of-the-art coverage of advances in the classical methods of consumer science. The book touches on the latest developments in qualitative techniques, including coverage of both focus groups and social media, while also focusing on liking, a fundamental principle of consumer science, consumer segmentation, and the influence of extrinsic product characteristics, such as packaging and presentation on consumer liking. In conjunction with the second volume, which covers alternative approaches and special applications, this book is an invaluable reference for academics working in the fields of in-sensory and consumer science, psychology, marketing and nutrition. And, with examples of the methodology being applied throughout, it serves as a practical guide to research and development managers in both food and non-food companies. Presents a fully comprehensive coverage of the latest developments in the classical methodologies of consumer research Provides examples of successful application of the methodologies presented Includes focus groups and social media discussions Encompasses consumer segmentation, with a focus on psychographics and genetics (Southern Music). Transcribed for bassoon from studies by Hause, Gariboldi, Terschak, Kummer, Dont, Gambaro, Drouet, Lazarus and others. This open access handbook brings together the latest research from a wide range of internationally influential scholars to analyze educational policy research from international, historical and interdisciplinary perspectives. By effectively breaking through the boundaries between countries and disciplines, it presents new theories, techniques and methods for contemporary education policy, and illustrates the educational policies and educational reform practices that various countries have introduced to meet the challenges of continuous change. Based on an analysis of the nature of education policy and education reform,

this volume focuses on education reform and the concept of education quality. Adopting a historical and comparative perspective, it examines the dialectical relationship between education policy and education reform in various countries, assesses theoretical and practical issues in the process of moving from regulation to multiple governance in contemporary education administration, and explores the impact of globalization on national education reform and the interdependence between countries. In addition, it presents studies addressing educational policy research methodology from multiple perspectives. Highlighting the changes in national education macro policies, this volume comprehensively reveals the complex relationship between contemporary education reform and social change, and explores the links between contemporary social, political and economic systems and educational policy research and practice, offering a holistic portrait of macro trends in contemporary education reform.

At the turn of the last century C. G. Jung began his career as a psychiatrist. During the next decade three men whose names are famous in the annals of medical psychology influenced his professional development: Pierre Janet, under whom he studied at the Salpêtrière Hospital in Paris; Eugen Bleuler, his chief at the Burghölzli Hospital in Zurich; and Sigmund Freud, with whom Jung began corresponding in 1906. It is Bleuler, and to a lesser extent Janet, whose influence bears on the studies in descriptive and experimental psychiatry composing Volume 1 of the *Collected Works*. This first volume of Jung's *Collected Works* contains papers that appeared between 1902 and 1905. It opens with Jung's dissertation for the medical degree: "On the Psychology and Pathology of So-called Occult Phenomena," a detailed analysis of the case of a hysterical adolescent girl who professed to be a medium. This study foreshadows much of his later work and is indispensable to all serious students of his psychiatric career. The volume also includes papers on cryptomnesia, hysterical parapraxes in reading, manic mood disorder, simulated insanity, and other topics. This *First Book of Practical Studies* is designed to develop chord consciousness and to provide additional experience in the fundamental rhythms, key signatures and articulations and to improve accuracy in reading through the use of interesting and melodic studies. It may be used either to supplement or to follow any beginning method book. About a decade ago we edited *The Psychology of Humor*. Besides the summary chapter and bibliography of about 400 items, the book contained eleven original papers that represented the state of knowledge at that time. We confess that it was not easy to fill that volume with first-rate contributions. In a few instances we invited contributors only on the basis of having heard through the grapevine that they were doing interesting work on humor. Our sources proved reliable and we were pleased with the results. We even made new friends as a result of these blind invitations. But the fact remains that in the early 1970s there was only a handful of social scientists studying humor and laughter. The history of humor research prior to the 1970s can also be characterized in terms of the short-term commitment to investigating humor among those who did venture out and try their hand at designing humor studies. For reasons that remain unclear, many investigators published only one or two humor studies before abandoning the area in favor of some other research domain. We have the impression that for decades social scientists have been very intrigued by the idea of studying humor. Psychologists have suspected for a long time that humor somehow is very important in the lives of people. We find laughter and humor occurring almost wherever we find people engaged in social interaction. The first of a two-volume project delving into the doctrine of justification. Michael Horton seeks not simply to recover a clear message of its role in modern Reformed theology, but also to bring a fresh discovery of the gospel in a time when contemporary debates around justification have reignited. The doctrine of justification stands at the center of our systematic reflection on the meaning of salvation and grace as well as our piety, mission, and life together. And yet, within mainline Protestant and evangelical theology, it's often taken for granted or left to gather dust in favor of modern concerns and self-renewal. Volume 1 is an exercise in historical theology, exploring the doctrine of justification from the patristic era to the Reformation. This book: Provides a map for contemporary discussions of justification, identifying and engaging principal sources: Origen, Chrysostom, Augustine, Thomas Aquinas, John Duns Scotus, William of Ockham, Gabriel Biel, and the magisterial reformers. Studies the transformations of the doctrine through Aquinas, Scotus and the nominalists leading up to the era of the Reformation and the Council of Trent. Concludes by examining the hermeneutical and theological significance of the Reformers' understanding of the law and the gospel and the resultant covenantal scheme that became formative in Reformed theology. Engaging and thorough, *Justification* will not only reenergize the reader—whether Protestant or Catholic—with a passion for understanding this essential and long-running doctrinal conversation, but also challenge anyone to engage critically with the history of the Church and the heart of the gospel. *Oxford Studies in Philosophy of Mind* presents cutting-edge work in the philosophy of mind, combining invited articles and articles selected from submissions. Each volume will highlight two themes to bring focus to debates. The series will reflect the diversity of methods adopted in contemporary philosophy of mind and provide a venue for rigorous and innovative work by both established and up-and-coming voices in the field. The themes in this inaugural volume are the value of consciousness, and physicalism and naturalism. Other essays concern the nature of mental content, and dualism in medieval Islamic philosophy. This collection identifies the key tensions and conflicts being debated within the field of critical disability studies and provides both an outline of the field in its current form and offers manifestos for its future direction. Traversing a number of disciplines from science and technology studies to maternal studies, the collection offers a transdisciplinary vision for the future of critical disability studies. Some common thematic concerns emerge across the book such as digital futures, the usefulness of anger, creativity, family as disability allies, intersectionality, ethics, eugenics, accessibility and interdisciplinarity. However, the contributors who write as either disabled people or allies do not proceed from a singular approach to disability, often reflecting different or even opposing positions on these issues. Containing contributions from established and new voices in disability studies outlining their own manifesto for the future of the field, this book will be of interest to all scholars and students working within the fields of disability studies, cultural studies, sociology, law, history and education. The concerns introduced here are further explored in its sister volume *Interdisciplinary approaches to disability: looking towards the future*. Some students enter classrooms with an "I dare you try to teach me" look on their faces, and others bounce into class excited to learn and anxious to please the teacher. We know we can't automatically blame teachers or schools when students don't want to learn. But we also know that sometimes teachers and schools don't always set students up for success, and they don't always help them love what they're learning. *Why Kids Love (and Hate) School: Reflections on Practice* investigates some of the school and classroom practices that help students love school—and some that send students in the opposite direction. Intended for classroom teachers, teacher education students, and school administrators, chapters in the book investigate a variety of topics: how schools can build effective school cultures, the "struggle" students encounter in learning, practices of other countries that help students love school, testing practices that cause students to hate school—and much more. Perfect for courses in: Introduction to Education, General Methods, Management/Assessment, Educational Research, Educational Administration/Leadership,

Teacher Leadership, Curriculum Theory, Curriculum Development. An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students. This updated edition of The Anthology of Social Studies presents a powerful and exciting vision of social studies. It has a stronger focus on elementary examples, a new chapter on teaching elementary students to think geographically, updated references, and a greater emphasis on the use of innovative technologies and digital resources in social studies. This collection blends specific, practical teaching suggestions with important discussions of the foundational issues at the heart of social studies teaching. It is an essential resource for pre-service and practising elementary teachers and curriculum developers."-- pub. desc. (Robert Cavally Editions). Use with Level 1 of Developmental and Progressive Studies , Cavally's newly released complete pedagogy for the flute: * Tone Studies (HL00119355) * Scale Studies (HL00117659) * Velocity Studies (HL00119361) For many years Robert Cavally's Melodious and Progressive Studies has been one of the most important series for intermediate flute study. Book 1 (HL00970024) contains a wealth of famous studies by such composers as Andersen, Gariboldi, Kohler and Terschak. Book 2 (HL00970025) is a continuation of Book 1 and also includes etudes by Kummer. For further technical and musical development, Book 3 (HL00970031) features the work of Boehm, Kronke, Kohler and Mollerup, as well as excerpts of solos by Haydn, Bizet, LeClair and Jongen. Also available: For advanced students: Melodious and Progressive Studies, Book 4A - 30 Virtuoso Studies by Ernesto Kohler (HL00970012) Melodious and Progressive Studies, Book 4B - 6 Grandes Etudes by Pierre Camus (HL00970013) For beginning students: Let's Play the Flute - A Book of Melodious and Progressive Studies (HL00970161) Issues for 2014- cataloged as a serial in LC. Oxford Studies in the Philosophy of Law is an annual forum for new philosophical work on law. The essays range widely over general jurisprudence (the nature of law, adjudication, and legal reasoning), philosophical foundations of specific areas of law (from criminal to international law), and other philosophical topics relating to legal theory.
